Saunas

PRODUCT CATALOGUE

Saunas are historical to Finnish culture, a necessity for everyone. With the course of time sauna bathing has become a world wide phenomena. Saunas have covered a long journey from traditional to the present range of Infrared saunas. Indians not being far understand the benefits of sauna bathing.

ADVANCE MARKETING INC. came into existence in year 2000, providing solution to the basic human need of bathing. During this experience, we were able to make a niche in the market for our products that included Steams and Saunas. We have expertise in manufacturing our products to the highest order and we take care of even the minutest of details, just to ensure that you get the best product.

Company's strategic choice of offering a quality product capable of satisfying a larger consumer bracket has proved to be an extremely successful decision.

Our advance saunas provide you the same relaxing and reviving experience like the original Finnish saunas.

Our passion is to give you hand crafted and genuine sauna experience keeping in view your diverse choices.

No one in India has ever thought of making such variety of saunas as we did.

The Benefit ...

To be true,
Saunas are meant
to open the pores
and flush out the body's
impurities and toxins.
It is the deepest cleaning
bath in the world.
It also relaxes your tired
and stiff muscles and
helps you maintain
clear and healthy skin.

CARDIOVASCULAR workout -
It burns out as much as
300 calories* in a session
and increases metabolic rate
and improves blood circulation.

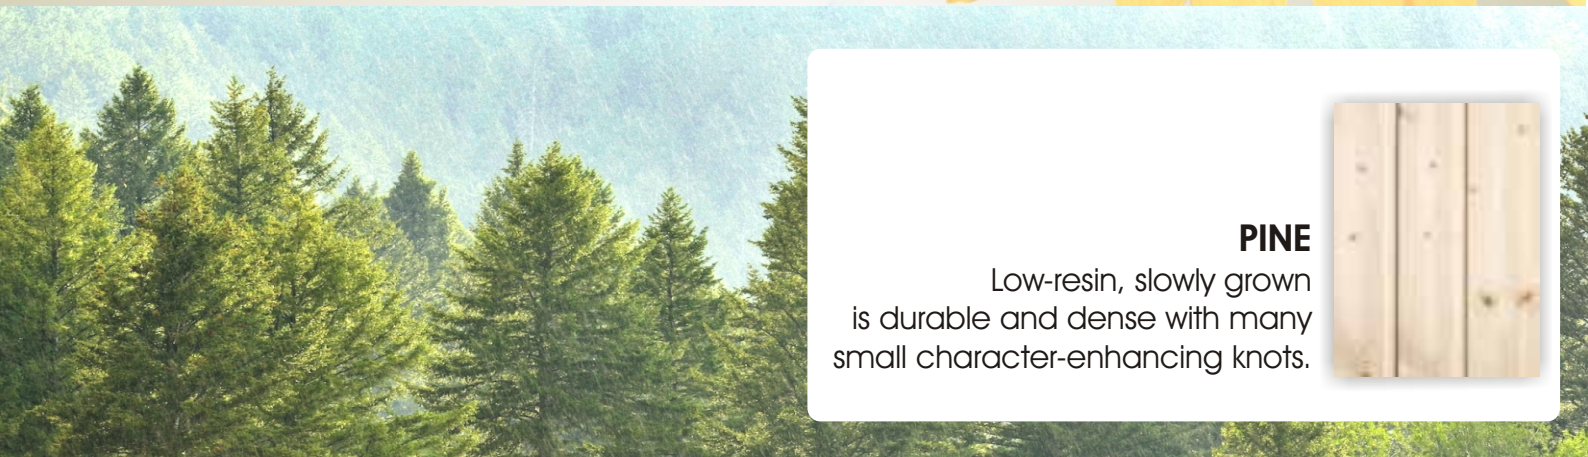

* When used with good diet and exercise program.

The Right Choice

advance's compressive range of saunas include

- Conventional Rock saunas
- Infrared saunas
- Himalayan Salt saunas
- Portable Saunas
- Outdoor saunas
- Accessories

PINE

Low-resin, slowly grown is durable and dense with many small character-enhancing knots.

■ Conventional rock sauna

As everybody understands, you sweat your body to high temperatures ranging 175 F to 195 F. You shed your worries as you shed your clothes, and let the relaxing sauna aura surround you. You also pour some water over the sauna stones that produce steam, which aids in perspiration.

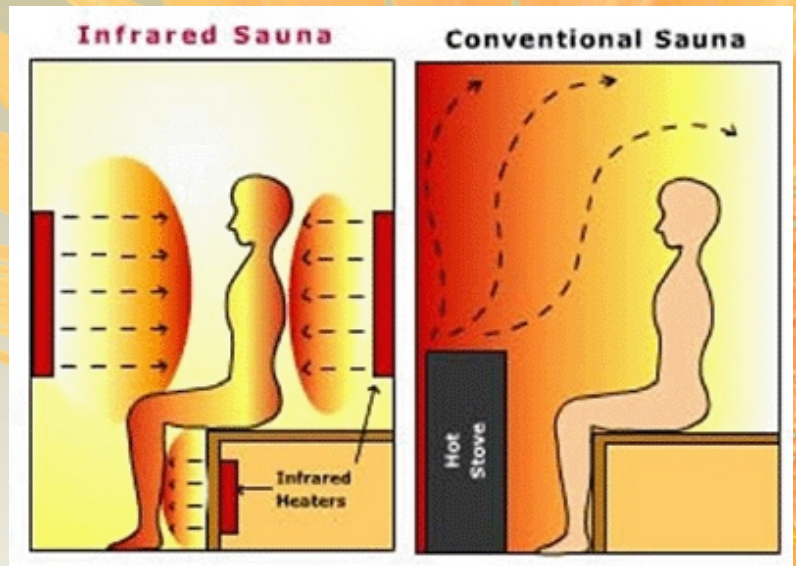

Infrared sauna *QUICK EASY AND COMFORTABLE . . .*

Gently seat yourself in infrared sauna and let it engulf you with the soothing heat. You indulge yourself listening to the soft music from the integral music system, or read a magazine as your body starts perspiration. You can also shift your mood under the color therapy lights which can be changed to your color.

Infrared Ceramic Heater

Carbon Crystal Heaters -

Carbon infrared sauna heaters reduce the risk of heat-associated health problems even further. Lower temperatures due to longer infrared wavelengths from carbon heating elements allow your body to safely tolerate longer sessions inside your infrared sauna. Carbon heating generally uses less energy, because lower surface temperatures are required to achieve necessary results.

■ Himalayan Salt Sauna ...

A Himalayan salt sauna is simply a combination of a conventional sauna, and a Himalayan salt room or salt cave. Regardless of what type of sauna you have, it can be easily “upgraded” or converted into a Himalayan salt sauna, with the addition of authentic Himalayan salt boulders and bricks and fixtures throughout the room.

Respiratory Relief through Salt Sauna Therapy...

Himalayan salt isn't like your table variety - it boasts a rich mineral composition that may release negative ions when heated. Breathe easier knowing that dry salt particles have been linked to improved respiratory conditions such as asthma and bronchitis - pretty impressive for something so simple. It's like turning every breath into a mini-spa treatment for your lungs.

Salt room saunas are making waves in well-ness, and for good reason. They're not just a trend; they offer real health perks you should know about.

Imagine walking into a room where the air tastes like a gentle sea breeze and each breath you take feels like it's purifying your lungs.

That's what stepping into a salt sauna can feel like, especially for those who struggle with respiratory issues.

The concept of halotherapy - or salt therapy - is grounded in centuries-old practices but is now backed by modern science.

The porte sauna introduces a sleek and practical single seated chamber providing all the benefits of traditional sauna with space and power saving. Single seated chamber providing all the benefits of a traditional sauna, with space and power saving features.
