

## **Planetary Administrators Differential Levels of Oneness—Evolving Truth Discernment**

TR Delores Pollard

11-10-25

Here is a word to reflect upon—*differential levels*. This holds the key to why things often seem so confusing and why we, as planetary administrators, are so careful in revealing and developing the reclamation now underway on your world. All of God's children are beloved, and He desires that no soul perish. Every level of understanding is accepted and nurtured, for there are countless helpers assisting in this process.

Consider a metaphor: take one drop from the ocean and view it under a microscope. See how many teeming life forms it contains. This gives you a glimpse of the multitude of beings that exist just beyond your present perception. So many levels of support and guidance are available to help establish and strengthen the circuits of light on your world.

However, you cannot teach a first grader college mathematics. There are beginners and there are masters—some visible, some invisible—living together, all aligned with the oneness of the Father. Yet not everyone can easily grasp this idea of oneness. It is not taught from birth on your world as it is on those of enlightened life. Oneness is a progressive development of mind and spirit for each soul.

Reflect on your own childhood and personal growth. You once thought quite differently than you do now. Some phases of development seemed false but served as stepping-stones leading you onward. Everything that exists does so within the Father's oneness. Nothing could exist otherwise. All that you perceive is allowed and has purpose.

As these circuits awaken, truth rises. Picture panning for gold—the dirt and mud slowly wash away until only the fine black sand remains, and within it, the pure gold: the living truth of the Father. This gold, though scattered now, will eventually lift your world into greater alignment, until a time comes when speaking of your cosmic cousins—your invisible helpers, morontia teachers, seraphim, and visitors from other worlds—will no longer seem incomprehensible to humankind.
