## Drive Courageous Behavior

Unlock the full potential of citizen development, the greatest enabler of change of a generation.

### What is Citizen Development?

Citizen development is one of the most exciting and current business movements. It enables Project Managers and other changemakers to create applications using low-code and no-code platforms, without complete reliance on the IT department and for a fraction of the cost and time commitment.

#### What does low-code or no-code mean?

Low-code or no-code development is the creation of applications software using graphic user interfaces or minimal basic code instead of large strings of complex coding. This term is often used to describe citizen development processes and technology. Low-code and no-code technology provides visual drag-and-drop or point-and-click user interfaces, making them easy for anyone to use.

**500,000**  
software developer deficit in the United States alone by 2024.  
*Source: Forrester*

**67%**  
of employers said they couldn't find qualified candidates to fill their open IT positions.  
*Source: Linux Academy*

**4x**  
more citizen developers than professional developers by 2023.  
*Source: Gartner*

**450 million**  
apps will be built in the next five years using low-code tools.  
*Source: Microsoft*

Increased IT backlogs result in bottlenecks and throttle innovation. The workforce is joining forces with IT and taking matters into their own hands with citizen development.

### Are you ready to be part of the movement?

### PMI's Role in the Citizen Development Movement

As a leader in project management, PMI empowers people to make ideas a reality.

PMI offers the world's first vendor-agnostic set of educational resources for citizen development.

The PMI Citizen Developer education suite provides the guiding principles of citizen development.

PMI Citizen Developer sets the industry standards and best practices for citizen development just as PMI sets the industry standards for project management.

### Project Managers are the Next Great Citizen Developers and Leaders

Project Managers can implement citizen development within their organizations to improve project management solutions. They can use low-code and no-code technology and take solutions into their own hands rather than waiting for their IT department to work through a backlog of projects with limited resources.

Citizen development benefits Project Managers by:

- Putting the power of innovation into the hands of the people directly involved in projects.
- Accelerating innovation.
- Providing operational cost savings.
- Increasing project team satisfaction.

### Unlock the Full Potential of Citizen Development

Learn more about the PMI Citizen Developer education suite and discover which path is right for you.
