| <b>Function</b>             | Fully Automated (Rice and vinegar added manually.)                                                                                                                           |

## Features

- Rice and vinegar are blended without damaging the rice grains like an experienced chef.
- Sushi rice is evenly cooled and mixed with simultaneous aeration and mixing.
- The sushi rice is poured out automatically when the mixing is complete.
- High grade non-stick resin eliminates Teflon coating.
- Drum parts (drum, lid, and agitator) can be taken apart in seconds for easy handling and cleaning.

\*Designs and specifications are subject to change without notice. \*Rice Amount Capacity described in Specification is based upon proper operation.
