LEVEL OF ACCOUNTABILITY:	HIGH	VARIABLE/ UNEQUAL
LEVEL OF AUTONOMY:	HIGH	VARIABLE/ UNEQUAL
COMPETITIVE ADVANTAGE : ATTRACT AND RETAIN TALENT		
RESULTS-FOCUSED:	 Accountable to objective, measurable results	 Mix of objectivity + subjectivity + timeclock mentality + work location policies
WORK LOCATION:	 Not scheduled, driven by work outcomes, fluid from day-to-day	 Scheduled, drive by traditional beliefs, not fluid
WORK HOURS:	 Driven by outcomes, time is not owed, work during most efficient and effective times of day	 Driven by time-clock mentality, owe 40 hours, some version of core hours (ex. 9-5 + more outside)
MANAGEMENT METHODOLOGY:	 Manage work (contemporary)	 Manage people (outdated)
PERFORMANCE DRIVEN:	 Results are the currency of work and drive performance	 Time + location is the currency that drives performance
EQUITABLE WORKPLACE:	 Achieved through autonomy	 Not applicable

GUARANTEED ROI ON INVESTMENT ON MOBILEERP

Our USP: Playbook ERP

Aspect	MobileERP Playbook and AI-Driven ERP	SAP Form-Driven ERP	Excel and Email-Based Systems
Automation	Dynamic workflows and AI-driven processes streamline tasks.	Forms dictate rigid processes.	Manual data entry and email-based approvals.
Efficiency	High efficiency due to automation and adaptability.	Moderate efficiency, but lacks agility.	Manual, time-consuming processes.
Insights	Real-time analytics for data-driven decisions.	Limited insights from static forms.	No built-in analytics; data scattered.
Collaboration	Facilitates cross-functional collaboration.	Collaboration limited by form-based workflows.	Collaboration relies on manual communication.
Scalability	Scalable due to dynamic playbooks.	Scalability depends on SAP customization.	Limited scalability; manual processes hinder growth.
User Experience	Intuitive, context-aware interfaces.	Forms can be cumbersome for users.	Excel lacks user-friendly interfaces.
Integration with Other Systems	Seamless integration with APIs and other tools.	SAP integrations may require custom development.	Limited integration; manual data transfers.
Security and Compliance	AI-driven security features enhance compliance.	SAP provides robust security features.	Limited security; email-based communication risks.
Cost	Initial investment, but long-term cost savings.	High initial and ongoing costs.	Low upfront cost, but hidden productivity costs.
Adaptability to Change	Agile and adaptable to business needs.	Customization may be slow.	Rigid; changes require manual adjustments.
Maintenance and Support	AI-driven self-healing capabilities.	SAP support available but may be complex.	Manual maintenance; email support.

The screenshot displays the MobileERP Playbook interface. The top navigation bar includes a hamburger menu, the user profile (1502.Komal Rana, Accounts Department, Paramount Limited, FY: 2425 - 26/07/2024), and various notification icons. The left sidebar lists navigation options: My Dashboard, My Workboard, KRA WORK MANAGEMENT (My Workspace KRA, Mr, lom, Pr, Payments), My Work Reports KRA, My Work Masters KRA, and ETM TASK MANAGEMENT (My Work, My Tasks, My Tickets, My Holds).
