WELCOME TO PATILFAB INDUSTRIES

Patilfab Industries, registered in 2023, is based in, Gujarat, India. It operates under MSME registration - GJ-25- 0066024 The company specializes in designing, manufacturing, installing, and maintaining a wide range of industrial and laboratory furniture, along with related products

PRODUCTS WE OFFER

- ◆ **MODULAR LAB FURNITURE & FUMEHOOD**
- ◆ **MODULAR OFFICE FURNITURE**
- ◆ **PASS BOX (STATIC & DYNAMIC)**
- ◆ **STORAGE CABINATE , LOCKER**
- ◆ **SS INDUSTRIAL FURNITURE**
- ◆ **STORAGE RACKS**
- ◆ **PP/FRP WORK & FABRICATION**
- ◆ **ALUMINUM PARTITION WORK**
- ◆ **FALSE CEILING WORK**
- ◆ **SCHOOL & INSTITUTIONAL FURNITURE**

SERVICES WE OFFER

- ◆ **LAB SHIFTING, DISMANTLING & REINSTALLATION**
- ◆ **FUME HOOD & LABORATORY REPAIRING**
- ◆ **ANNUAL MAINTENANCE CONTRACTS (AMC)**

C-TYPE MODULAR WORK BENCH

C-frame workbenches, such as the Patilfab model, are built for labs and provide a sleek, space-saving design that boosts productivity. They are strong and flexible, making the most of both vertical and horizontal space while being durable and comfortable to use. These versatile workstations are functional and stylish, making them important for today's workspaces.

PEDESTAL -TYPE MODULAR WORK BENCH

A pedestal-mounted workbench features a sturdy surface supported by a pedestal, making it ideal for laboratories that experience water or chemical spills, as it allows for easy floor cleaning. Made from durable materials like ERW pipes, these benches have leveling bolts for uneven floors..

PLINTH-TYPE MODULAR WORK STATION

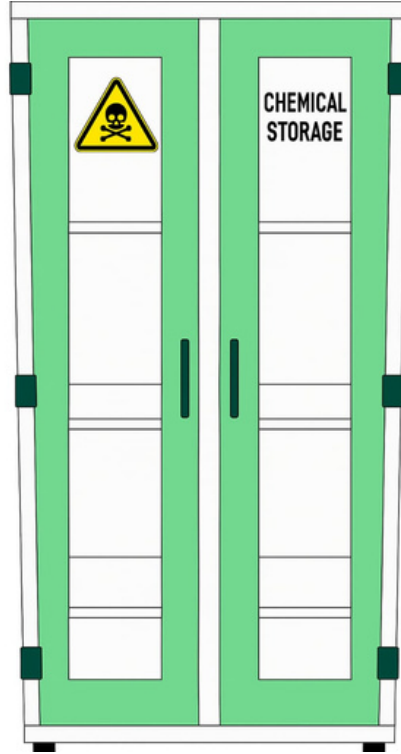

Skirting mounted workbenches are a modern alternative to pedestal-mounted design, as they are directly installed on a skirting. These benches are ideal for labs with minimal spill risks and dust-free environments, where under-cabinet cleaning isn't necessary.

ISLAND BENCH (CENTER TABLE)

Island tables are centrally placed lab workstations offering 360° accessibility for multiple users. Designed with durable materials, they support heavy equipment and integrated utilities for efficient lab operations.

CHEMICAL STORAGE CABINATE

A chemical storage cabinet is a specialized storage unit designed to safely store hazardous chemicals and substances. It is typically made of corrosion-resistant materials and includes features such as ventilation, spill containment, and secure locking mechanisms..11

FILE CABINATE, LOCKER, RACKS

ANTI VIBRATION TABLE

The Anti Vibration Table is designed for laboratory applications where vibration can affect instrument accuracy, such as with galvanometers and balances. It features an independent outer table and a heavily weighted inner table mounted on specialized rubber mounts to effectively dampen vibrations. The tables are available in three sizes: 600mm, 750mm, 900mm. In Patilfab AVT a small drawer is included for conveniently storing weights and accessories.

LAB STOOL, CHAIR, TABLE

Ergonomic lab stools, durable tables, and comfortable chairs designed for precision and performance

LAB, OFFICE OVERHEAD CABINET

PATILFAB Overhead Cabinets are specially designed for laboratory and industrial use, offering smart vertical storage to maximize workspace efficiency. Made with high-quality powder-coated GI or CRCA steel, these cabinets ensure durability, corrosion resistance, and a clean, professional look. Available with glass or metal shutters, they are ideal for storing lightweight instruments, glassware, and chemical containers safely and within easy reach.

LABORATORY SINK TABLE

PATILFAB Laboratory Sink Table:

Strong and chemical-resistant sink table designed for lab use, with water supply, drainage, and ample workspace for cleaning and washing tasks.

A fume hood, also known as a fume cupboard or fume closet, is a local ventilation device that minimizes exposure to hazardous fumes, vapors, or dust. There are two main types: ducted and recirculating (ductless). Both types draw air in from the front and either expel it outside or filter it for safe return to the room.

LAB FUME HOODS

TECHNICAL SPECIFICATIONS

- Material of Construction : CRCA Galvanized Iron Sheet (G.I.)
- Fume Hood Inner lining with chemical resistance phenolic resin 6mm sheet/SS 304 Sheet
- Sash of 5mm toughens glass with counter balance to achieve easy sliding movement
- Work surface – Natural Granite Ceramic
- Utility Valve – Water, Gas, Nitrogen & Vacuum
- LED Tube Light for Fume Hood
