

Supplier Quality Engineer

Medical Device Industry

US-based client - Remote

Alchemrise is looking for a Supplier Quality Engineer to join an innovative and fast-growing Medical Device Company based in the US. This role is an excellent opportunity to work on cutting-edge medical technologies while ensuring top-tier quality standards.

Role Overview:

As a Supplier Quality Engineer, you will collaborate with global suppliers and cross-functional teams to ensure compliance with medical device regulations and drive continuous improvement in supplier quality.

Key Responsibilities:

- Collaborate with suppliers to resolve quality issues and drive process improvements
- Develop and implement supplier quality metrics and risk management strategies
- Work closely with internal teams to ensure supplier qualification and performance monitoring
- Support investigations, root cause analysis, and CAPA implementation for supplier-related issues
- Support supplier audits and assessments to ensure compliance with ISO 13485, FDA regulations, and GMP

Key Requirements:

- Minimum 7 years, up to 10 years preferred, in supplier quality engineering within the medical device industry
- Proficiency in ISO 13485, FDA, QSR, GMP, and risk management principles.
- Strong analytical and communication skills to collaborate effectively with global teams and suppliers.
- Bachelor's degree in Engineering (Mechanical, Electronics, Mechatronics) or any other relevant discipline related to the medical device industry.

Work Timings:

Overlapping US and UK business hours, flexibility to work with global teams is required.

Work Location: Remote (India-based candidates supporting a US-based client)

Why Join?

- Work with a pioneering US-based medical device company
- Be part of a high-impact global quality team
- Competitive salary & seamless onboarding experience with Alchemrise handling payroll and compliance
- Training & career growth opportunities for freshers

If you're passionate about supplier quality in the medical device space, we'd love to hear from you!

Apply Now with your cover letter, and resume with the expected salary range.
