

The Brain

The control centre of the nervous system.

Cerebrum:

Moving, sensing, feeling, thinking, remembering, speaking.

Cerebellum:

Coordination, balance.

Brain Stem:

Breathing, heart rate, sleeping, consciousness.

Spinal Cord:

Carries messages from the brain to the rest of the body.

The Neuron

Nerve cells that carry messages around your body.

Cell Body:
Contains the nucleus.

Dendrite:
Receives signals from other neurons.

Myelin Sheath:
Speeds up the movement of the electrical messages.

Axon:
Carries electrical messages to other neurons.

Axon Terminal:
Sends messages to other cells.
