

TRBOnet Enterprise 6.3

PTT Mobile App 3.3

HIGHLIGHTED FEATURES

January 2025

TRBONET ENTERPRISE | PLUS

Video Calls & Recording BETA

TRBOnet 6.3 features real-time video calls and video call recording capabilities. These calls can be made between PTT mobile app users or between a PTT mobile app user and a dispatcher – via the **Classic console only**. TRBOnet One will support video calls in a future release.

Using the Classic console, the dispatcher can:

- ✓ Initiate a video call to a PTT mobile app user directly from the context menu.
- ✓ Share their screen with the PTT mobile app user.
- ✓ Switch between front and rear cameras on the mobile device during the call.

Incoming video calls appear in the Contact Dialer

Note: Video calls and recording features are licensed.

- Integrates MailingVox, an online SMS service (<https://www.mailingvox.com/>), allowing short messages to be sent to mobile phone users as part of Alarm Management events.

TRBONET ONE

The console now supports keyboard shortcuts for group calls. This functionality enables the connection of external PTT buttons for streamlined operation.

PTT MOBILE APP

Video Calls BETA

PTT Mobile App 3.3 introduces video call support, allowing users to connect with dispatchers or other PTT mobile app users. Video quality is dependent on device performance. Use [this benchmark](#) to select the appropriate video quality setting:

3DMark Wild Life Score	Recommended Video Quality
1500-2499	LD (144p)
2500-3999	SD (480p)
4000+	HD (720p)

Additional Features

Supports **AES-128 encryption** for secure communications.

Minimum location update interval reduced to **1 second**.

Note: Frequent location updates may impact battery life.

New Device Support

PTT Mobile App 3.3 now supports additional devices:

- Estalky E120, E550, E610, E618, E887, E966P
- Inrico TN7 Plus
- Kirisun T60, T65
- Telox MT100
