

Building a sustainable future from the ground and up

Our tiles feature a high-quality EPDM top layer, which is a safer, non-toxic material with full traceability, ensuring compliance with strict safety and quality standards. The base consists of lightweight and recyclable EPP, making the tiles significantly easier to handle compared to conventional alternatives. These tiles provide long-lasting durability and are suitable for both indoor and outdoor use.

Benefits of Safe Tiles EPDM

- Environmentally friendly
- Free from isocyanates and other dangerous chemicals
- Accessible for children and adults with disabilities
- Easy and quick to install and repair
- Lightweight and easy to handle (thanks to the EPP base)
