INTRODUCTION Teacher + Kara Bobowski

Simona: ... **everything started with the European project GINA – Green Inclusive Academy that is about inclusion and environment. It is a project where Kara Bobowski is involved with organizations from 10 European countries. Therefore, within this project we have decided to do something for our local community of Modigliana.** We have involved the voluntary association GAD that has a secondhand shop called “Re-fashion”, and the school because we think that is important to share this kind of messages with **young generations**. In addition to talk about sustainable fashion, this project wanted to give space to the protagonism of young people. **This project also talks about personal style, and uniqueness.** In fact, this evening, each one will bring their own uniqueness and diversity to the stage, because we are all different and unique. Together with the students of the school, also Kara Bobowski’s users of our residential centre and sheltered-working centre will parade on the stage. So, we leave to the show, enjoy everyone and thank you for being here.

Let's protect our seas and appreciate the value of what we have before it's too late.
