

The Best, For Less - Since 1969!

CARE & MAINTENANCE GUIDE

Multi-Family Flooring is just that, flooring designed for lively households, including active children and pets!

The following care and maintenance instructions should prove useful to both management professionals and tenants alike. With simple, yet thoughtful care, the flooring installed in your apartments will look beautiful and perform well for many years to come.

HARD SURFACE FLOORING

Regular Cleaning & Precautions

Sweep or vacuum regularly to remove dirt and grit that may scratch the floor. Wipe up spills and stains promptly and thoroughly with a damp cloth or mop. Clean with a vinyl-friendly solution. Avoid detergent, wax, polish, or oil soap. Rinse the floor well after cleaning to remove any residue.

Use felt tip protectors on furniture and mats in entryways to prevent damage. Avoid exposure to direct sunlight for prolonged periods of time.

CARPET

Spot Removal & Vacuuming

Spot removal: Act quickly. Blot, don't scrub the area with your cleaning solution. Several applications may be needed. Thoroughly rinse the area to prevent recurrence of the stain.

Vacuuming: Your carpet should be vacuumed as many times per week as there are people in your home. Nothing prolongs the life and look of your carpet like frequent vacuuming.
