

**X** ↔ **Y**

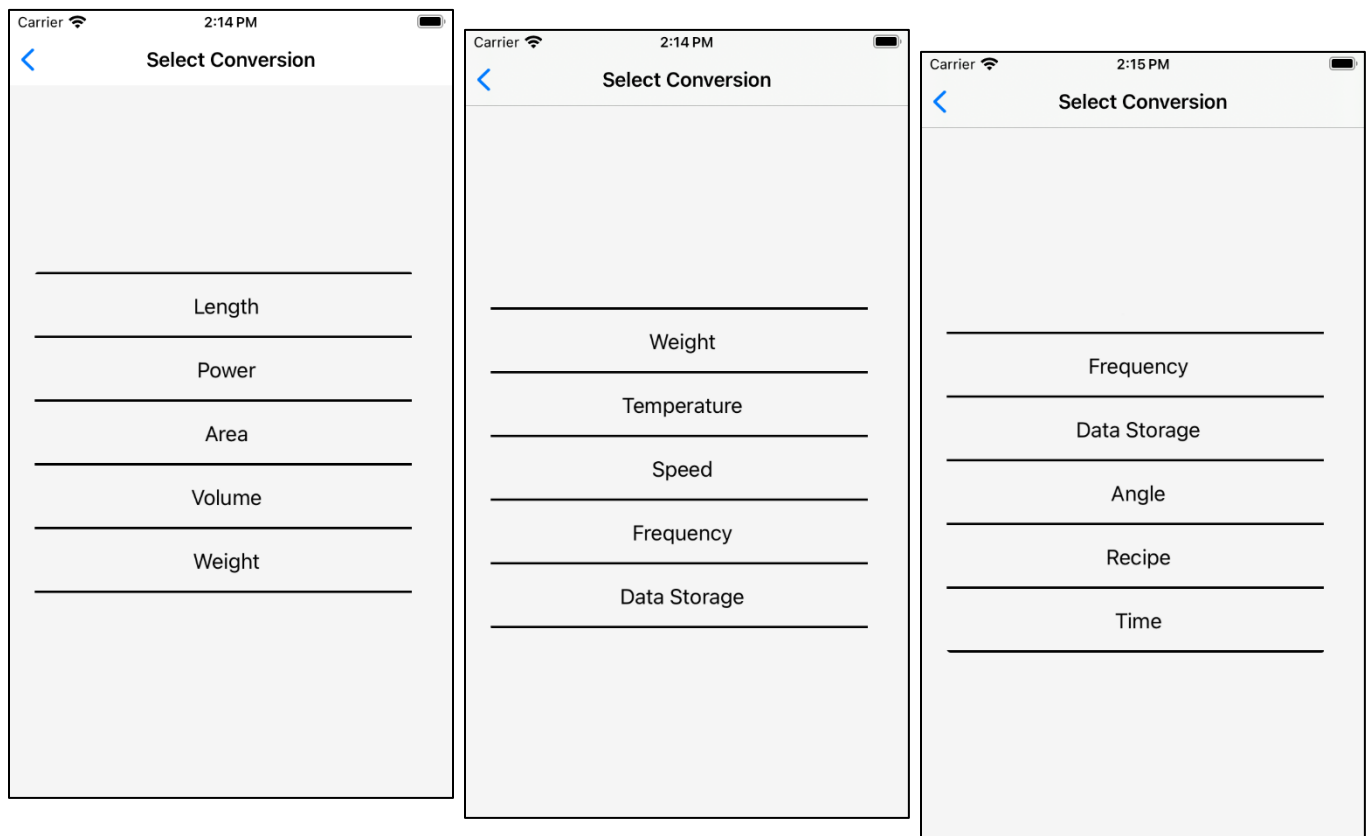

# Conversion Wizard

**USER' S GUIDE**

CONVERSION WIZARD is a one-stop utility for common unit conversions. They include:

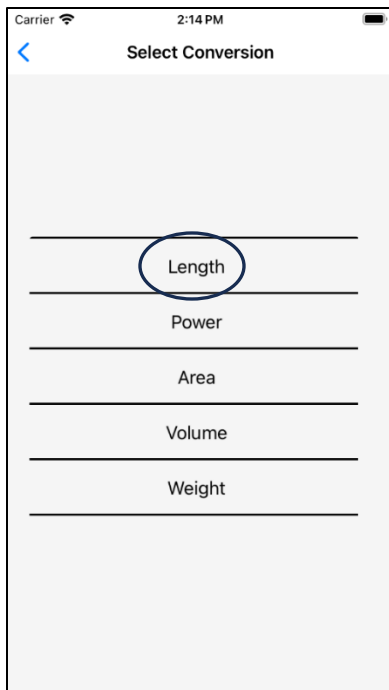

- Length
- Power
- Area
- Volume
- Weight
- Temperature
- Speed
- Frequency & Wavelength
- Data Storage
- Angle
- Recipe
- Time

If the device is iPhone size, the list of conversions will be displayed in a scrollable table:

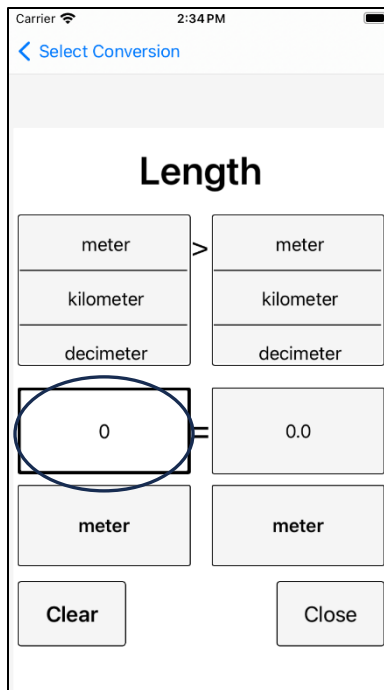

To select a conversion, simply tap the appropriate unit description.

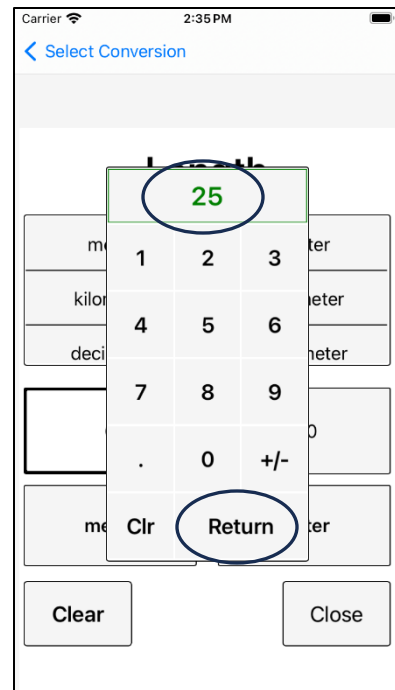

Example: Convert 25 miles to kilometers:

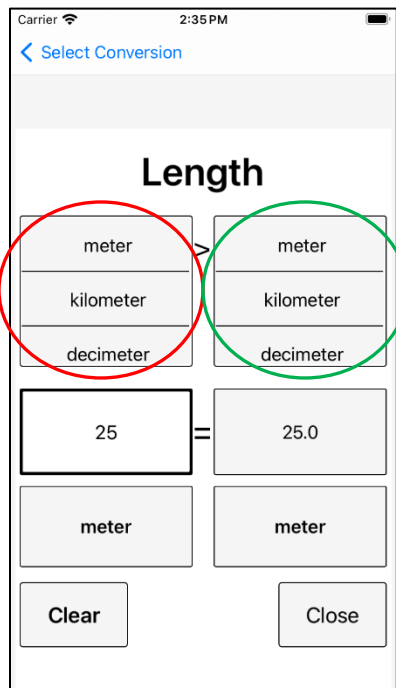

Tap the "Length"  
table option

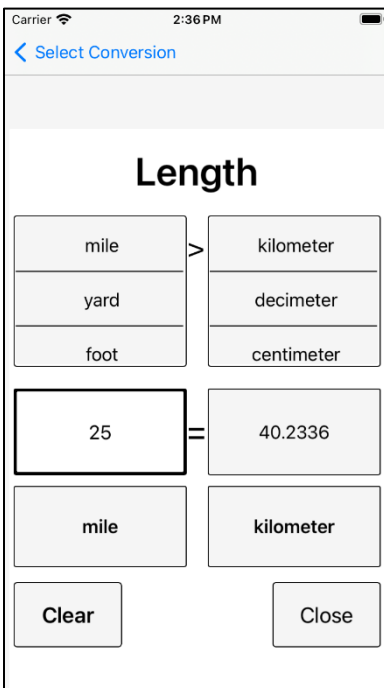

Tap the "Input"  
box to open  
keyboard option

Enter "25" and  
then press Return

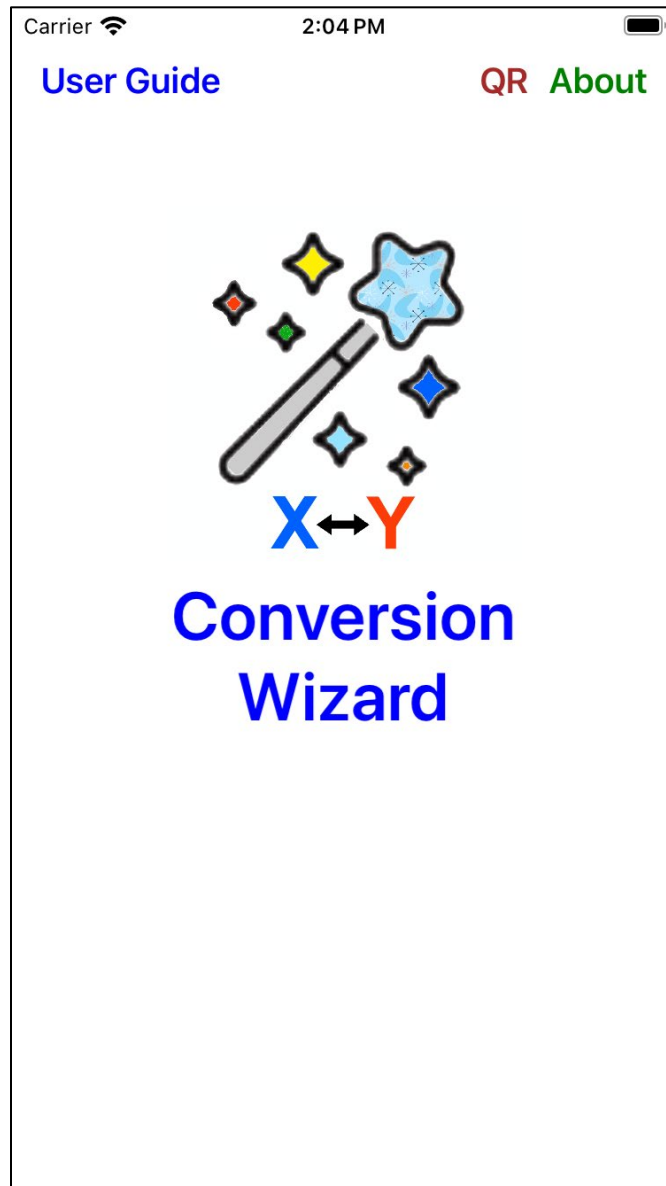

Roll the **LEFT**  
wheel to "mile"  
and **RIGHT** wheel to  
"kilometers"

25 miles is equal  
to 40.2336 km.
