REGIONAL TILE SUPPLY ARCHITECTURE

As part of the **Rogin Group Limited (RGL)** diversified portfolio, our premium tile supply and procurement framework delivers architectural-grade surface solutions to commercial, industrial, and high-end residential developments across the SADC region. Centered entirely within our highly efficient **Zambia Operational Hub**, we streamline direct factory sourcing, strict batch uniformity grading, and cross-border customs clearing. This centralized distribution approach ensures that high-volume orders are dispatched seamlessly along regional transport corridors, providing consistent material grading and uninterrupted site supply pipelines for commercial general contractors in both Zambia and Malawi.

1. ARCHITECTURAL PORCELAIN SURFACES

Ultra-dense, low-porosity vitrified tile solutions designed to endure heavy foot-traffic loads while preserving high-end visual aesthetics.

Polished & Matte Vitrified Porcelain Tiles

Engineered through extreme heat compression to ensure near-zero water absorption. Perfect for expansive corporate lobbies, high-end retail developments, and demanding public reception halls.

Specification Item	Standard Dimension	Core Technical Metric
Executive Porcelain Series	600mm x 600mm 800mm x 800mm	Water Absorption < 0.5% (Vitrified)
Finishing Grades	High-Gloss Polished / Anti-Slip Matte	PEI Rating: 4 to 5 (Heavy Commercial)

2. PREMIUM INTERIOR CERAMIC SOLUTIONS

Versatile, beautifully glazed ceramic selections optimized for wall cladding and high-style indoor floor applications.

GLAZED INTERIOR CERAMICS

Glazed Ceramic Wall & Floor Selections

Featuring rich pigment glazing layers that repel stains, chemicals, and moisture. Specially designed for hygienic kitchen environments, bathrooms, and modern commercial wall features.

Application Profile	Standard Dimension	Surface Maintenance Level
Hygienic Wall Cladding	300mm x 600mm 200mm x 400mm	Stain Resistant / High-Wipe Glaze
Residential Floor Lines	400mm x 400mm	PEI Rating: 3 (Medium Residential)

3. HEAVY-DUTY INDUSTRIAL & QUARRY FINISHES

Uncluttered structural clay and high-thickness profiles built specifically for manufacturing plants, automotive workshops, and back-of-house logistics zones.

Extruded Industrial Quarry & Technical Clinker Tiles

Thick, unglazed, natural clay slabs that offer remarkable slip resistance and massive compressive load capacities. Engineered to withstand forklift movements and acidic chemical spills without structural pitting.

Industrial Variant	Thickness Rating	Impact Tolerance Profile
Technical Unglazed Quarry	12mm to 15mm Enhanced Profiles	Fully Acid & Chemical Proof
Heavy Transit Slabs	300mm x 300mm Standard	High Compressive Loading Capacity

ZAMBIAN HUB LOGISTICS & QUALITY ASSURANCES

By routing our regional distribution networks straight through our tactical Zambian base, RGL guarantees reliable material tracking and structural parity for cross-border projects.

Strict Batch and Dye-Lot Uniformity Controls

To prevent color variance on large-scale surfaces, our Zambian team cross-checks and catalogs tile batches by dye-lot numbers prior to secure palette dispatch, eliminating mixed-tone delivery issues at the project site.

Cross-Border Transit SADC Corridors

Leveraging our established commercial freight networks, RGL moves bulk volume orders quickly from our Zambian distribution hub directly into Malawian staging networks, complete with pre-cleared customs manifests to eliminate logistical downtime.

REGIONAL INTAKE & ORDER PLACEMENT DESK

For bulk project estimates, container-level trade quotes, or to confirm stock availability for commercial architectural schedules, contact our regional distribution desks:

ZAMBIA HUB (OPERATIONAL SUPPLY BASE)

Corporate Distribution Hub: Lusaka, Zambia
Operational Hub Center: Chipata, Zambia
Logistical Jurisdiction: Cross-Border Dispatch Desk

MALAWI GATEWAY (CORPORATE INTAKE)

Administrative Gateway: Area 58, Lilongwe, Malawi
Project Coordination: Regional Contracts Desk
