Forex & Financial Markets Risk Disclosure

Trading in foreign exchange, futures, and related financial instruments carries substantial risk. You should carefully consider whether trading is appropriate for you in light of your financial circumstances, experience, and risk tolerance. If you do not fully understand any information provided on this website, please contact us or seek independent financial advice before proceeding.

Kyston Capital — Market Opinions

Any opinions, commentary, analysis, prices, or market insights published on this website or through any Kyston Capital communication channel are provided for informational and educational purposes only. Nothing on this website constitutes investment advice, financial advice, or a solicitation to buy or sell any financial instrument. Kyston Capital and its principals will not accept liability for any capital loss or damage — including but not limited to loss of profit — arising directly or indirectly from reliance on any information provided.

Information Maintenance

All content on this website is subject to change at any time without prior notice and is provided solely to assist individuals in forming their own independent views. While Kyston Capital takes reasonable steps to ensure the accuracy and reliability of information presented, we make no guarantee of its completeness or accuracy and accept no liability for any loss or damage arising directly or indirectly from the use of, or inability to access, this website or its content.

Government Required Risk Disclaimer

CFTC Rule 4.41: Hypothetical or simulated performance results have certain inherent limitations. Unlike actual trading records, simulated results do not represent real trading activity and may not reflect the impact of real market factors such as liquidity constraints. No representation is made that any account will or is likely to achieve profits or losses similar to those illustrated.

Any trading performance displayed by Kyston Capital is hypothetical in nature. Hypothetical results carry no financial risk, and no simulated record can fully account for the impact of real financial risk in live trading — including the ability to withstand losses or maintain adherence to a strategy during adverse market conditions.

Required Risk Disclaimer

Forex, futures, options, and commodity trading involves significant potential for both reward and loss. You must fully understand and accept these risks before engaging in any market activity. Do not trade with capital you cannot afford to lose.

Nothing on this website constitutes a solicitation or offer to buy or sell any financial instrument. Past performance of any strategy, model, or methodology is not necessarily indicative of future results. All trading decisions are made at your own risk.

By accessing any Kyston Capital content or services, you acknowledge that all trading decisions are solely your own responsibility. Kyston Capital and its principals cannot be held liable for any losses incurred as a result of information accessed through our platform.
