

I'm your friendly lion guide through the jungle. Meet some amazing animals from different parts of the world. I want to introduce them to you and tell you about them in my own special **Timbiu way**.

Gorilla (Africa): These huge animals are very gentle and live in families that take care of each other, just like people.

Sloth (Central & South America): It is so slow that green algae grow on its fur. Then it looks like it is a little bush itself.
