Illustration 1:

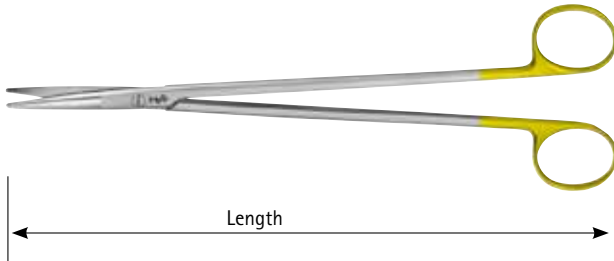

Illustration 2:

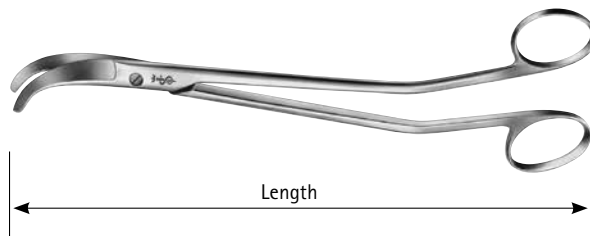

Illustration 3:

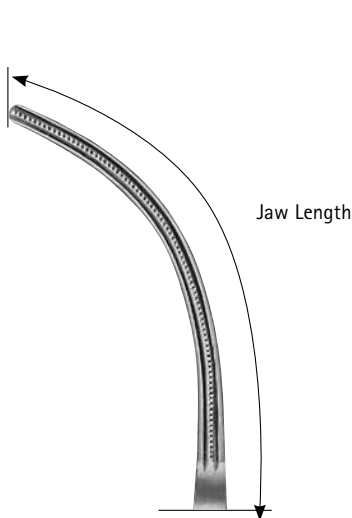

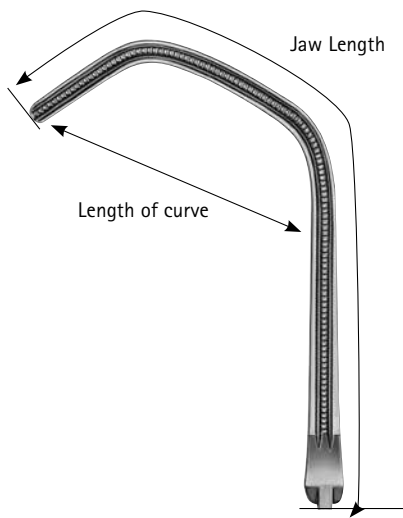

Illustration 4:

## Instrument Length:

To measure the total length of an instrument, start at the bottom of the instrument and measure to the farthest tip in a straight line (*Illustration 1*).

For curved and angled instruments, the distance of a perpendicular line drawn from the bottom of the instrument to the farthest point will determine the overall instrument length (*Illustration 2*).

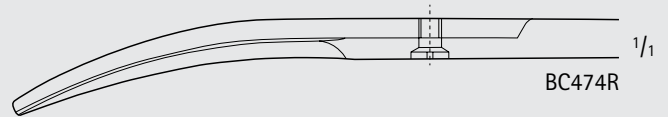

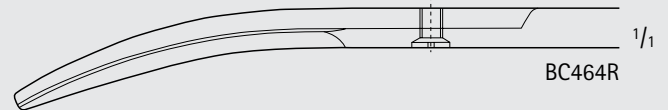

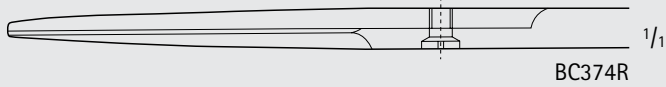

## Jaw:

The jaw length of a clamp is measured from the beginning of the jaw to the bottom of the serrations (*Illustration 3*). For partial occlusion clamps, see *Illustration 4*.

Tip and jaw illustrations are approximate unless otherwise noted.
