- Multi-year service contracts (3-5 year) offered at 15-25% discount.
- Emergency expedited services available 24/7 with premium surcharge (50% uplift).
- Virtual delivery for all training, coaching, and mentorship services; on-site implementation available for additional travel fee.
- Spanish-language services available for bilingual organizations (additional 20% service fee).
- Accessibility accommodations (ASL, captions, large-print materials) available upon request at no additional cost.
- Impact reporting and community benefit documentation provided for all nonprofit grantmakers and funders.

ABOUT AICAREAGENTS247

This exhaustivemenu reflectsAICAREAGENTS247'smissionto provide affordable, sector-specific, deeply specializedAI compliancesupport to California'smission-driven organizations while maintaining transparency about the gap between market-rate private services and subsidized public-benefit pricing.

AICAREAGENTS247 operates as a California Nonprofit Public Benefit Corporation dedicated to democratizing AI compliance, making high-level governance tools accessible to community leaders through subsidized "Public Benefit Costs" and tiered donation structures. The organization's financial model explicitly contrasts market-rate services ("Retail Industry Value") against deeply discounted rates designed for nonprofits, healthcare systems, churches, and mission-driven entities navigating California's increasingly complex AI regulatory landscape.

Organizational Structure and Governance

AICAREAGENTS247 is governed by the AICAREAGENTS247 Public BenefitNonprofit Corporation Education Board™, which maintains fiduciary oversight, strategic vision, and monitoringofresearch integrity and certification programs. The Board ensures organizational compliance with California nonprofit law and evolving AI regulatory mandates through standing committees covering Curriculum and Certification,Finance, Ethics and Compliance, and Advocacy and Research.

The California Association of Nonprofit AI Compliance Officers (CAAIKO™) operates as the professional membership association for certified AI compliance officers, promoting best practices, continuous education, and statewide advocacy in alignment with AICAREAGENTS247's mission. This dual structure—a nonprofit corporation administering certification alongside a professional association supporting practitioners—mirrors established models in healthcare, legal, and accounting professions.

Research and Policy Advocacy

The organization operates the California AI Policy & Compliance Research Program™, featuring multi-sector AI compliance audits, mixed-methods research with stakeholders, and transparent dissemination of findings through reports and policy briefs. Research outputs inform regulatory bodies and are incorporated into certification curricula, public education initiatives, and capacity-building programs.

AICAREAGENTS247 maintains proactive partnerships with the Governor's Office, Attorney General's Office, California Privacy Protection Agency, Department of Managed Health Care, and academic AI policy research centers to ensure training and policy productions remain current and legally sound. The organization reports that it has helped prevent fines for 50+ organizations in 2026 through its compliance tools and training programs.

No part of this publication may be reproduced, distributed, or transmitted in any form or by any means including photocopying, recording, or electronic sharing without prior written permission from the publisher, except where permitted by copyright law or authorized in writing by AICAREAGENTS247™.

This publication and all associated materials are part of the CCAICO Partner Kit and its related AI compliance and governance programs. Every component including written content, visuals, system frameworks, and training processes is thoroughly documented and maintained in secure organizational archives. All documentation and development processes are available upon formal request for verification, audit, or educational purposes.

In accordance with California transparency and ethical governance standards, our organization adheres to an open creation and disclosure policy. We provide clear insight into how all materials are conceived, developed, and implemented — from our books and compliance frameworks to our operational systems and educational resources.

We also conduct regular training sessions aligned with the same methodologies outlined in this publication. These sessions ensure accuracy, consistent application, and accountability throughout all programs and partner organizations.

This approach reflects our ongoing commitment to ethical authorship, responsible AI governance, and public accessibility under California law, including SB942, SB1120, AB2013, and related compliance frameworks.

FOUNDER'S WORD

“Our mission has never been rooted in technology alone, but in trust, responsibility, and service. Every framework we create is built to uphold the public good ensuring that innovation strengthens communities rather than distances them. Transparency is not simply a policy for us; it is a principle of governance, a promise of accountability, and the standard by which we measure progress. Through every toolkit, training, and guide, we reaffirm one truth: ethical innovation is not optional, it is California’s legacy and our shared duty to protect it.”

Rayfield Tremont Johnson III
Founder, AICAREAGENTS247™
