

PATIENT INFORMATION LEAFLET

ON

LASER HAIR REMOVAL

Laser hair removal uses focused laser to target the pigment (melanin) in hair follicles / roots, converting light energy into heat to destroy the follicle's ability to regrow hair without damaging surrounding skin.

HOW MANY SESSIONS IS NEEDED FOR COMPLETE TREATMENT

No of session depends upon many factors usually it takes between 4 to 8 sessions.

WHAT IS THE INTERVAL BETWEEN TWO SESSION

it depends upon the hair regrowth, usually 30 to 45 days interval between two sessions.

WHAT SHOULD WE DO FOR THE HAIR REGROWTH BETWEEN THE TWO SESSION

You can shave the hair in between the laser session, No threading or waxing is allowed.

WHAT DO I EXPECT AFTER TREATMENT

You may have slight redness or a tiny red bump in the treated area. Usually, it takes few hours to a day to disappear.

DOES LASER HAIR REMOVAL WORKS FOR GREY HAIR

Laser Hair removal works only for black hair

DONT SHAVE THE AREA FEW DAYS BEFORE TREATMENT

This will enable the doctor to access the results of previous session.

IS THE TREATMENT PAINFULL

you will experience mild discomfort or like a rubber band snap sensation.

WHAT SHOULD I APPLY POST TREATMENT

post treatment apply sunscreen daily.
