Who We Are

From fabric development to bulk production, we help brands eliminate sampling surprises and sourcing delays.

YUNLAN Textile is a woven fabric manufacturer based in Shengze, Suzhou, China, specializing in functional fabrics, stretch fabrics, and high-performance woven textiles.

- * Serving outdoor, sportswear, workwear, and urban apparel brands
- * Providing support from fabric development, sampling, finishing, to bulk production
- * Focused on solving key sourcing risks: sample-to-bulk inconsistency, unstable lead times, and finishing performance variation

Company Strength Overview

Reliable capacity for consistent bulk production

Production & Supply Foundation

* Factory located in Shengze, Suzhou, one of China's key textile manufacturing clusters

* 47,000 m² production area, suitable for stable, large-scale woven fabric production

* Bulk production lead time: 15-25 days, supporting project schedule management

* Third-party testing can be arranged through SGS / BV / ITS

Product Range

Functional, stretch, textured and everyday woven fabrics

Core Fabric Categories

*Functional Fabrics: water repellent, windproof, breathable, and moisture-wicking fabrics

*Stretch Fabrics: T400, T800, and spandex-blend fabrics with stretch and recovery performance

*Interwoven / Structured Fabrics: blended, yarn-interwoven, dobby, jacquard, and textured woven constructions

* Everyday Woven Fabrics: basic woven fabrics for shirts, uniforms, casualwear, and everyday apparel applications

Urban Apparel

Functional Fabric Capabilities

Engineered for real-world wear — not just laboratory performance data

Finishing Capabilities

*Waterproof & Water Repellent: DWR, PU coating, and TPU lamination

*Breathable & Moisture Management: breathable, moisture-wicking, and quick-dry performance

*UV Protection: UPF 30-50+ solutions for sun-protective apparel applications

* Anti-static / Easy-care / Antibacterial: customized according to project requirements

* PFAS-Free Performance Fabrics: CO DWR and fluorine-finishing solutions

Stretch Performance & Comfort

Comfort, recovery and durability for modern apparel

Stretch Fabric Solutions

*2-Way / 4-Way Stretch: designed for activewear, travel wear, and everyday commuting apparel

*T400 / T800 / Spandex: different stretch structures and recovery performance options

* Mechanical Stretch: balancing structural stability with a comfortable hand feel

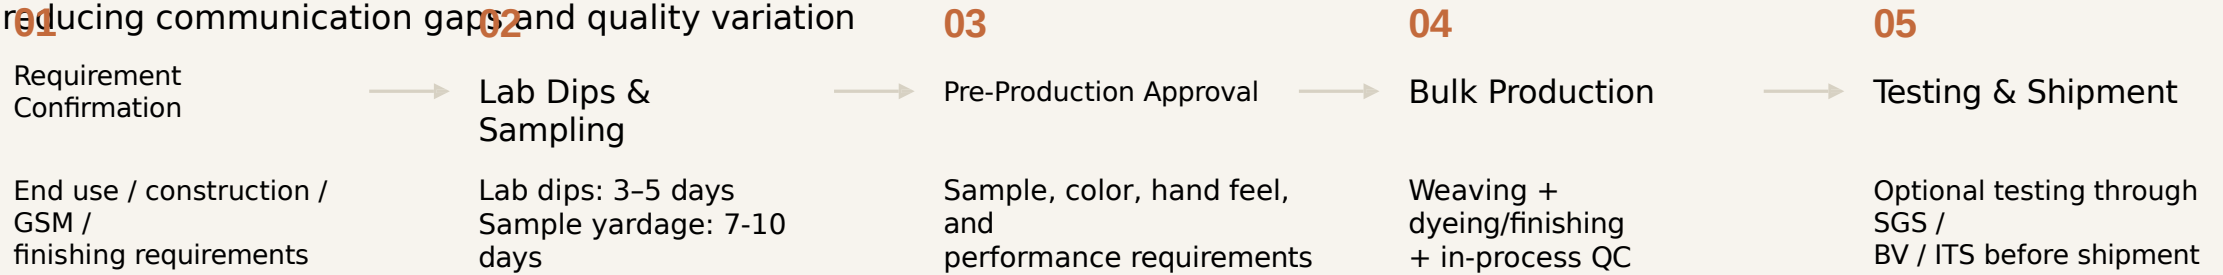

* Durable / Abrasion Resistant: suitable for outdoor, pants, and workwear applications

Application Areas: activewear, hiking pants, softshell jackets, business-casual trousers, and urban functional outerwear.

Development & Production Process

From requirement confirmation to bulk shipment, reducing communication gaps and quality variation

Quality Control

The key to Sample = Bulk Quality is process control

* Pre-production technical confirmation: construction, GSM, color, finishing requirements, and testing standards

*Weaving and dyeing/finishing in-process inspection: reducing variation in hand feel, fabric structure, and color shade

* Pre-bulk / Pre-shipment inspection: third-party testing can be arranged according to customer requirements

*Focused on real-world performance: water repellency after washing, breathability and comfort, abrasion resistance, and stretch recovery

Support

Compliance & Sustainability

Supporting safety, environmental responsibility, and regulatory risk control for the European market

PFAS-Free & Compliance

*Supporting compliance requirements such as REACH, OEKO-TEX®

and GRS based on project requirements

*Fluorine-free / C0 DWR options are available to help reduce PFAS-related risks.

* Risk control from raw materials, dyeing, and finishing to post-finishing processes

*Testing and verification can be arranged through SGS / BV / Intertek

Not just fabric — a safer choice for your brand.

Customer Pain Points & Our Solutions

Identifying risks early in the sampling and pre-production stages

× Sample does not match bulk production

✓ **Strict QC + pre-production approval to help ensure bulk quality matches the approved sample**

× Water repellency decreases after washing

✓ **Selecting the appropriate DWR system based on required performance standards, including post-wash performance validation when necessary**

× Unstable lead times

✓ **Greige fabric stock + controlled production planning to support 15-25 day bulk lead times**

× Low communication efficiency

✓ **Fast response, clear technical documents, and continuous follow-up from development to bulk production**

× Uncontrolled production risks

✓ **Pre-production verification + third-party testing + pre-shipment inspection**

Application Scenarios

Outdoor Jackets

Water repellent, windproof, breathable, and durable woven fabrics

www.yl-fabric.com

Sportswear

Stretch, moisture-wicking, quick-dry, and lightweight performance fabrics

Urban & Workwear

Structured, abrasion-resistant, easy-care fabrics for daily and professional use
