About me.

I'm a skilled and detail-oriented video editor with advanced proficiency in Adobe Premiere Pro, Davinci Resolve, and the broader Adobe Creative Suite. With three years of undergraduate study in media and production, I developed a solid foundation in visual storytelling, post-production workflows, and creative problem-solving. I am now further enhancing my craft through a master's degree, expanding my technical abilities and deepening my understanding of narrative structure, motion graphics, and industry-standard editing practices. I am committed to delivering polished, impactful content and thrive in collaborative, fast-paced creative environments.
