

PT SURYA UTAMA NIAGAJAYA

COMPANY PROFILE

About Us

Our company is committed to delivering reliable power solutions through continuous improvement and innovation. We design and install high-quality generator sets powered by diesel, natural gas, and biogas, along with mobile lighting towers, gasoline generators, and hybrid power systems. These solutions are designed to exceed customer expectations. We have been providing efficient power solutions for large-scale international projects, including construction, telecommunications, data centers, shopping malls, hotels, residential buildings, supermarkets, sports facilities, mining operations, hospitals, research centers, educational institutions, and industrial plants worldwide.

Today, thanks to our high-quality generator sets, which are certified with international quality standards and equipped with world-leading engine brands and reliable alternators to meet the diverse output requirements of various projects, along with 24/7 prompt after-sales technical support and maintenance services in over 120 countries, we are your trusted power solutions partner, anytime and anywhere you need us. Our mission is to meet the power needs of end users and service providers globally, ensuring their operations run smoothly with top-tier products at competitive prices.

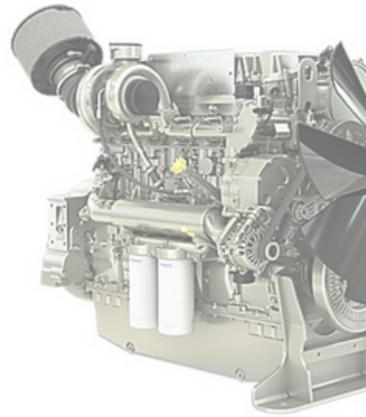

PT. Surya Utama Niagajaya is a leading importer, supplier, and key distributor in Indonesia, specializing in delivering high-quality products and services across various sectors. The company plays a crucial role in sourcing and distributing innovative solutions for generating sets, electrical equipment, and spare parts, ensuring that customers receive reliable and efficient products. With showroom warehouses strategically located in Medan and Jakarta, PT. Surya Utama Niagajaya has established a strong presence in the Indonesian market, offering a wide range of products for diverse industrial needs.

MISSION Focusing on ensuring customer satisfaction by offering high-quality products and delivering exceptional after-sales services, with the aim of building long-term relationships and meeting all customer expectations through reliable support and solutions.

VISION To position ourselves as a leading and innovative supplier / distributor, delivering products and services that meet internationally recognized quality standards.

We market products under the **Sun Power** brand trademark, with PT. Surya Utama Niagajaya appointed as the Sole Agent and trademark holder, as indicated in the Certificate of Registration as the Sole Agent for Foreign Manufactured Goods.

We place a high priority on product quality, design, raw materials, and excellent teamwork to ensure that every project we handle runs smoothly. Our continuous working methods, supported by qualified experts, aim to provide customer satisfaction for every product we offer. Our primary target market includes regions in Java, Sumatra, Kalimantan, and all of Eastern Indonesia, serving both private and government sectors.

Our company's quality policy reflects its commitment across all management and staffs to fulfill departmental responsibilities, ensuring the achievement of organizational functions and objectives in alignment with the company's vision and mission. As such, the quality policy is communicated throughout the organization. Our quality objectives are met through established targets, which are regularly reviewed to assess their effectiveness in supporting the quality management system.

Our quality policy and objectives: **Sun Power** as a distributor of generating sets, we are fully committed to:

- Increasing customer satisfaction
- Marketing high-quality diesel generating set products
- Improving productivity and effectiveness in marketing diesel generating sets
- Implementing a controlled management system with continuous corrective improvements
- Managing human resources that are high-quality and professional

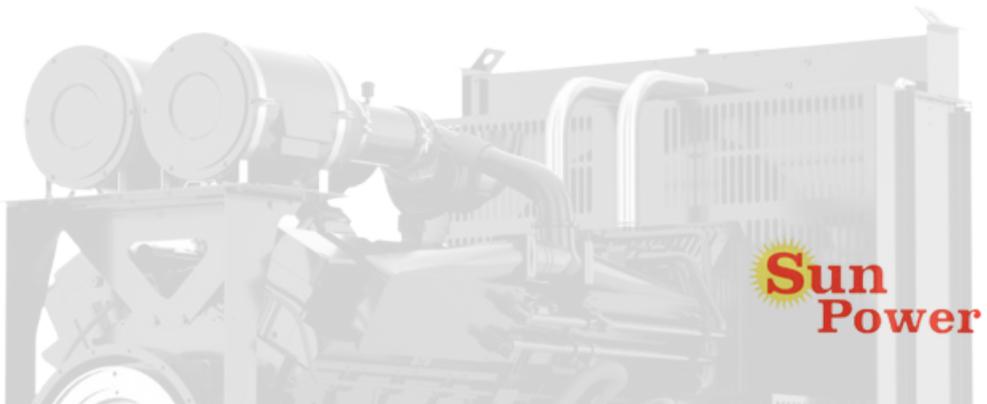

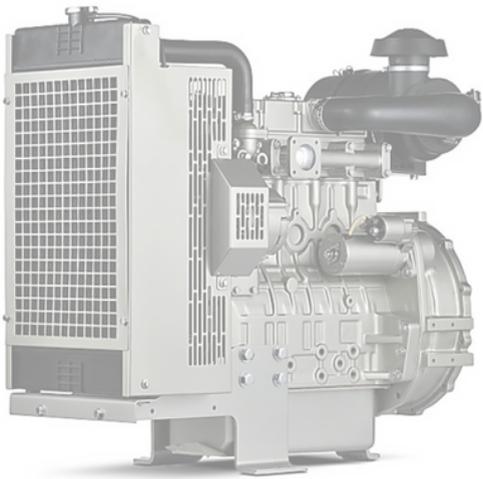

"Empowering Your World with Reliable Solutions"

Our company is dedicated to fostering a culture of sustainable development by adhering to high-performance standards in our operations and actively seeking out opportunities for business growth.

Mainly responsible for assisting customers who use reciprocating engines, turbines, and related components across various industries, including electric power, industrial, petroleum, marine, and rail sectors. The role involves overseeing business strategy, product design, management, development, manufacturing, marketing, sales, and providing ongoing product support.

Our Services

Our company specializes in the supply, installation, and after-sales services of diesel and gas generator sets ranging from 8KVA to 3300KVA. Our skilled technicians and engineers work with top engine brands such as Cummins, Perkins, MTU, Mitsubishi and many more, paired with leading alternators like Stamford, Leroy Somer and several more. We provide comprehensive power solutions to a wide range of sectors, including telecommunications, finance, aviation, energy, oil, mining, healthcare, and more.

Residential and Commercial Power Solutions

Power outages, even for a few hours, can lead to significant revenue loss for your business. Security systems fail, perishable goods spoil, and customers are turned away. We offer a diverse selection of commercial generators powerful enough to back up your home or business, ensuring you're always ready. Keeping you operational and competitive.

Total Reassurance

We are dedicated to ensuring your satisfaction with all our generator products, offering reliable after-sales support. For all your generator parts, services and maintenance needs, we are here to assist.

Generator Warranty Coverage

We stand behind the quality of its generator products with a one-year limited warranty (or 2000 hours, whichever comes first), subject to terms and conditions.

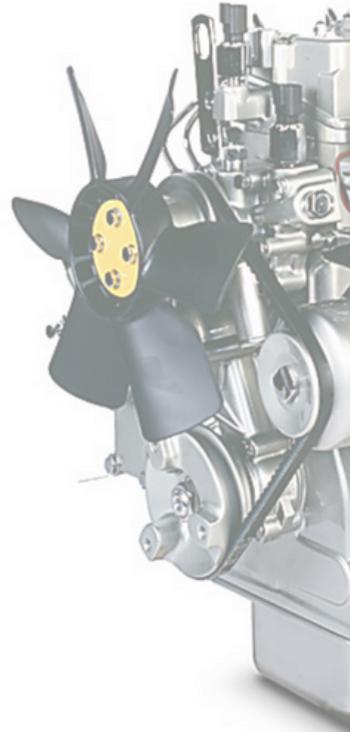

Generator Spare Parts

We offer a comprehensive selection of genuine spare parts for your generator.

Generator Service, Maintenance, and Testing

We offer regular service and maintenance contracts for both new and existing diesel generators.

- ✔ **Total Reassurance**
- ✔ **Warranty**
- ✔ **Spare Parts**
- ✔ **Service, Maintenance and Testing**

Our Partners

Our Featured Product

Plat Canopy with Protective Coating

Main Features:

- 2mm gauge hot galvanized plate for durability
- Zinc content of 80g/m² for enhanced corrosion resistance
- Strong adhesion and superior anti-corrosive properties
- Oil and Stripe-free, ensuring environmental protection
- Designed to withstand seaside environments

Galvanizing is an essential technique for protecting steel from corrosion. This is because the zinc creates a strong protective layer on the steel surface and also provides cathodic protection. Even if the galvanized layer is damaged, the zinc still helps prevent corrosion of the steel by serving as a protective barrier.

Punching using Computer Numerical Control (CNC) lathe

Based on the drawings, input workpiece parameters such as size, shape, position and quantity into the punching machine's computer.

Key feature includes:

- High precision, ensuring consistent quality
- Multi-axis coordination for processing complex-shaped parts
- High efficiency, typically 3-5 times faster than conventional machines

The Welding Process

Point Welding

Welding Forming

Chassis material: 4mm gauge hot roll plat

Size Calibration

Joint Grinding Processing

Chassis Forming Process

Preliminary treatment by Clearing Polisher

Main Features:

- Enhances the anti-fatigue performance of components, extending their service life
- Relieves areas of high stress
- Significantly enhances the surface quality of the workpiece

Our Commitments

- **Customer Satisfaction**

Ensuring the quality of service remains excellent at all times, consistently reviewing any existing issues, and quickly and responsively finding the best solutions for every customer complaint. Continuously developing potential work methods, mastering technology, and enhancing individual managerial skills. Our company guarantees that every product and service marketed meets customer needs and satisfaction, in line with the company's mission.

- **Improving Work Productivity and Effectiveness**

Our company continuously improves work methods, ensuring that every product marketed is of high quality and on par with internationally standardized products. The level of productivity will increase in line with the growing customer purchases, allowing us to consistently meet all customer needs accurately.

- **Managerial Excellence**

Our management continuously develops both individually and systemically, ensuring that the company's management system evolves in line with the changing times. This is done to ensure managerial excellence in leading, directing, and motivating our employees to consistently market high-quality products.

- **Human Resource Development**

Our company focuses on the development and training of human resources, which are believed to be the cornerstone of success in various sectors of business competition. Employees are given the opportunity to enhance their knowledge through on-the-job training in workshops and direct involvement in customer projects.

- **Commitment to Environmental and Workplace Safety**

We consistently market environmentally friendly products with low pollution levels. We prioritize the safety of our employees while working, always providing guidance to perform tasks carefully and with attention to detail.

Our Portfolio

We have directly marketed a wide range of products and services to customers across Indonesia, serving various sectors including private enterprises, factories, PKS or palm oil mills, hotels, apartments, hospitals, offices, educational institutions such as schools and universities, residential households, as well as government offices. Thanks to the strong cooperation among our employees and the trust placed in us by our customers, we have been able to successfully promote and carry out electrical work on-site, ensuring the highest standards of quality, efficiency, and excellence in every project.

The success we achieved today is a direct result of our ability to meet the challenges and demands presented by each of our customers. This accomplishment has been made possible through the support of exceptional management quality and the expertise of our skilled and reliable human resources. It is through their dedication, professionalism, and commitment to excellence that we have been able to consistently deliver outstanding results and maintain a reputation of trust and reliability within the industry.

Main Products Include:

- Generating Sets (Genset)
- Synchronization Panels, ATS Panels, AMF Panels, and Distribution Panels
- Diesel Engine Spare Parts
- Electrical Genset Spare Parts (AVR, Droop Kit, etc.)

The growing demand for power supply products has motivated us to enhance our marketing efforts. Considering that the power supply industry is entering a new era, presenting new opportunities with a clear vision and generating resources to realize that vision.

We are fully open to discussions with customers who require power supply products, dedicating time to understand your needs and foster collaborations for procurement that can be effectively executed, along with more efficient technical surveys.

We are committed to providing high-quality products and exceptional after-sales services to all our customers.
