

RoadSense360™ Services *From Data Acquisition to AI-Driven Insights*

Turn Real-World Sensing into Actionable Intelligence

RoadSense360™ is more than a sensing platform. It is a **full-service solution** that enables organizations to collect, process, analyze, and operationalize multi-modal data for real-world decision-making. We provide **end-to-end services** that transform raw sensor data into high-value insights across mobility, infrastructure, and public safety applications.

RoadSense360™ Services

Data Acquisition As a Service (DaaS)

Data Processing, Management, and Annotation

AI/ML Model Development & Optimization

Infrastructure Intelligence & Analytics

Public Safety & Situational Awareness Services

Why RoadSense360™ Services

- ✓ **End-to-End Solution** – From data capture to actionable insights
- ✓ **Real-World + Scalable** – Fleet-based deployment for continuous data generation
- ✓ **High-Fidelity Data** – Synchronized, multi-modal, AI-ready datasets
- ✓ **Rapid Deployment** – Plug-and-play platform with minimal setup
- ✓ **Flexible Engagement Models** – Project-based, subscription, or long-term contracts

Engagement Models

- Pilot programs and field demonstrations
- Data collection campaigns
- Subscription-based analytics services
- Custom AI/ML development projects
- Verification & validation services

Get Started

RoadSense360™ is **deployment-ready today**.

We partner with customers to deliver **measurable outcomes—not just technology**.
