

The leader in AI-powered defense

Anticipate and stop threats with security built for SMB

 Microsoft

RLTech delivers modern, AI-driven security solutions built on Microsoft's unified platform. We help SMBs strengthen protection, simplify operations, and reduce risk with fast, expert implementation and ongoing security guidance.

In today's evolving threat landscape, small and medium-sized businesses (SMBs) need fast and precise responses that keep pace with change. Many teams, however, find themselves weighed down by disconnected tools, nonstop alerts, and limited staff that increases risk.

83%

of organizations face repeated breaches due to poor predictive tools¹

68%

of SMBs consider secure access for remote workers critical²

81%

of SMBs have an increased need for data protection with AI³

Prevent attacks with *Modern security operations with unified platform (SMB)*

Optimize prevention and predict attacks using the most complete security platform with AI-driven recommendations. AI-powered tools from Microsoft security, designed for SMB, lets you proactively improve your security posture with threat-intel-driven insights that identify potential attack paths and eliminate blind spots.

The platform offers a powerful way to safeguard your business, reducing exposure by dynamically hardening your attack surface and minimizing the risk of vulnerabilities.

50%

decrease in number of false positives³

80%

reduction in incident response effort³

60%

reduction in cost savings from vendor consolidation³

We're a Microsoft partner with in-depth experience with security. Let's discuss a customized cloud protection plan for your business.
