Our services include supply and installation of self- leveling Epoxy Floors, Polyurethane Floors, Epoxy Screeds, Metallic Epoxy Floors, and 3D Epoxy Floors. We also manufacture aluminum such doors, windows, shopfront installation and services

About Us

The Company

Tahor Projects is a resin flooring company with its headquarters in Johannesburg. We have years of experience in industrial, commercial and residential resin flooring. Our experience allows us handle projects of various complexities with a guarantee of high quality.

As a customer-focused leader of the industry, Tahor Projects offers a wide assortment resin flooring services including self-leveling epoxy flooring, polyurethane flooring epoxy flooring, epoxy screed, metallic epoxy floors and 3D epoxy floors. We provide our services with the utilization of high-quality approved flooring materials and equipment. All the services offered by us are appreciated by the clients for their exceptional quality.

Our Brief History

Our journey began in 2017 with pen and paper. By embracing change and focusing on innovative flooring ideas, we've grown along with our clients to become one of the most preferred resin flooring company in South Africa. Over the years, Tahor Projects has experienced growth in all its dimensions from the number of Employees we have to the number of clients and sectors we serve.

What we Stand For

Our Vision

Our vision is to become the undisputed leader in our kind of business by providing the best services to our clients while finding innovative and sustainable ways of being a better corporate citizen in the community in which we work.

Our Values

Passion is at the heart of our company. We are continuously moving forward, innovating and improving.

Our DNA is also made up of Integrity: We are honest, open, ethical, and fair. People trust us to adhere to our word. We treat you that way because that is how we would like to be treated.

Our Mission

Tahor Projects Company Ltd is committed to installing quality products that protect, maintain and enhance residential, commercial and industrial environments. We strive to maintain

The South African leadership position in the marketplace with the support of those who stand behind the Tahor Projects name, and who passionately believe that success happens because of the people who make it happen.

Our Products

A. Industrial and Commercial Flooring Solutions

1. Self-Leveling Epoxy

A self-leveling epoxy floor coating system with an attractive, seamless gloss finish. Self-leveling epoxy (SL 2000) is a multi-component, self-smoothing, solvent free, epoxy overlay system designed to provide continuous protection for concrete floors at thicknesses of between 2-3 mm.

The cured material produces a dense, colourful, glossy surface. SL 2000 has excellent wear and abrasion resistance to floors subjected to high volume traffic. Its smooth, ultra-dense and high gloss finish is ideal for situations requiring a hygienic, easily cleaned surface.

Advantages

Excellent wear and abrasion resistance, Easily applied, Smooth high gloss finish for hygienic applications, available in multiple colors, Easily cleaned, Good general chemical resistance, Colourful and improves the working environment

2. Epoxy- Screed

Tahor Projects Epoxy Floor Screed is a four part epoxy resin based material. It has been developed typically for areas where optimum abrasion, impact and chemical resistance combined with decorative effects are required.

By using the most up to date in solvent free technology, Tahor Projects Epoxy Floor Screed will produce an easily cleaned, non-toxic, chemically spill resistant floor with good colour retention.

Advantages

Featuring excellent durability, abrasion, impact and chemical resistance and a smooth easy to clean gloss finish which are used in spaces with high foot and vehicle traffic. This is a perfect flooring solution where aesthetics, durability and cleanliness are key requirements. Commonly used in; laboratories, hospitals, food and beverage, chemical factories, and garages to produce a decorative performance self levelling floor system.

3. Polyurethane Floor Coating

Polyth self-leveling, HACCP International certified, smooth, antimicrobial treated cementitious medium duty polyurethane floor system.

Polyth MD provides a lightly textured protective floor finish suitable for applications in wet and dry process environments.

It is dense and impervious, providing the ideal floor finish for applications in the food and beverage, pharmaceutical and chemical industries and wherever a robust, long lived floor is required.

Advantages

High chemical resistance, high moisture tolerance, Abrasion resistant, Hygienic, easy to clean, & odorless

B. Residential/Decorative Flooring Systems

1. Metallic Epoxy Floors

Give your floor this marble look with Tahor Projects's metallic epoxy that employs a combination of different metallic pigments to deliver an exciting glossy marble finish.

Remember, mixing different colors in what makes it even more exciting.

Are you thinking of a color match already?

2. 3D Epoxy Floors

3D epoxy flooring uses a three-dimensional image on the floor which is coated with multiple layers of a transparent epoxy resin.

3D Epoxy floor coating is a very flexible approach to floor decoration. With 3D epoxy coating, you could enjoy a wide array of designs, colours and real-to-life representations that create illusionary effect.

Perfect for both commercial and residential applications .

3. Epoxy Flakes Floors

Epoxy flooring flakes are designed to increase the durability of your epoxy floors while offering a high-quality finish. These epoxy flakes/chips offer texture and color to your clear/transparent epoxy floors.

Tahor Projects epoxy flake flooring system allows you to create a completely bespoke epoxy floor. Offering all the advantages of our epoxy floor coating this system also has the added attraction of unique, decorative flakes.

The flakes create a smooth appearance that is easy to clean with industrial strength ideal for heavy foot and vehicle traffic.

4. Self-leveling Microcement Floors

Microcement flooring is a versatile and popular choice for modern interior design, known for its seamless and durable finish.

Tahor Projects's self-leveling microcement is a mixture that contains finely ground cement with the addition of pigments. For mixing, a liquid in the form of a polymer solution is used. Another component of such a coating is a protective coating that prevents moisture penetration and abrasion as a result of stress.

Micro concrete plaster has the following advantages:

- High level of adhesion, as a result of which the material can be easily applied to any type of surface, except for smooth tiles;
- Low consumption and a thin layer of application - no more than 3 mm after drying;
- High strength, similar to stone coating and resistance to abrasion due to stress;
- Original appearance, allowing to create coatings of different shades and using color pigments;
- Moisture resistance, thanks to which micro concrete can be used in the bathroom, shower, kitchen, as well as in the corridor

Aluminum Manufacturing & Installation

Doors & Windows

Designed to your specifications and unlimited configurations available

- Stack folding
- Sliding
- Pivot door
- Double door
- Single door

Aluminium Windows

Casement windows are hinged on the side and crank open out ward to

- Stack folding
- Sliding window
- Shopfront
- Top hung

Glass & Glazing

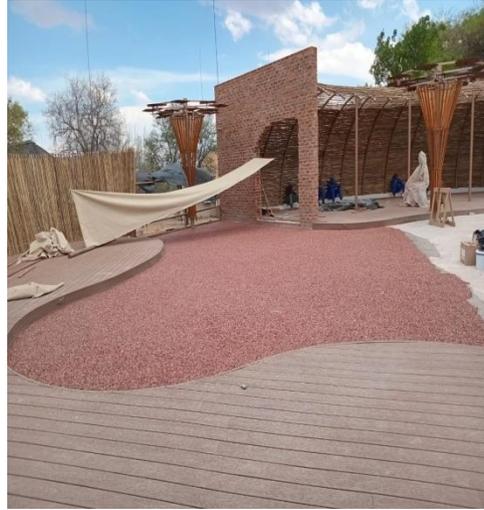

Any type of glass available for example

- 6, 38 safety/ 4mmclear
- Mirror/ obs
- Toughened
