COLLABORATION  
WORLD.**®

# WHO WE ARE

**PC WORLD** is a trusted technology consulting partner working closely with organizations to drive digital transformation, enhance operational efficiency, and create long-term sustainable value.

We collaborate with clients across Saudi Arabia and the MEA region to align technology initiatives with strategic business objectives through a partnership-driven approach.

Our expertise spans IT automation, system integration, governance, and sustainability solutions.

By strengthening collaboration across business ecosystems, we help organizations improve transparency, optimize operations, and adopt environmentally responsible and sustainable operating practices across their value chains.

D

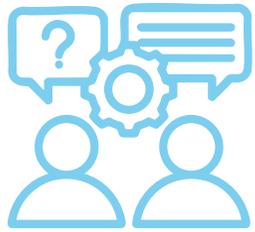

# OUR VISION

Our vision is to be the trusted partner of choice for building resilient, future-ready, and sustainable digital environments.

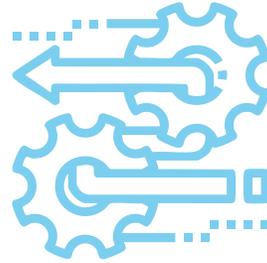

# OUR MISSION

To advise, design, and deliver IT and cloud solutions that translate business strategy into secure, scalable, and high-performing digital environments.

We combine consulting expertise with execution excellence to help organizations achieve measurable and sustainable results.

AUTOMATION

INTEGRATION

Automation is crucial for enhancing efficiency, reducing human error and enabling teams to focus on strategic and high-value tasks.

# IT AUTOMATION

Empower IT teams and boost business performance  
with intelligent IT automation

# IT AUTOMATION

## AI-powered IT Operations

### App Visibility and Insights

Simplify and optimize app management and technology operations with generative AI-driven insights

### Enterprise observability

Enhance visibility and comprehension with full-stack scalable application and network health and performance monitoring

### Automated operations

Dynamically and continuously assure cost-effective application performance and resource utilization

### Cost management

Automate data-driven cloud spend decisions to safely reduce costs, eliminate waste, and boost ROI

### Incident management

Automate and orchestrate end-to-end IT and network operations at scale with efficiency and resiliency

Document processing

Workflow automation

Decision management

Content services

AI and machine learning

### Process mining and modeling

- Discover frequency, rework, duration, and cost from real data
- Generate process models
- Analyze impact on KPIs
- Simulate future processes

### RPA and digital labor

- Perform repetitive tasks
- Act on data extracted from unstructured documents
- Automate systems that do not have APIs

### Core automation

- Content services
- Document processing
- Workflow automation
- Decision management
- Low-code applications

### AI and operational intelligence

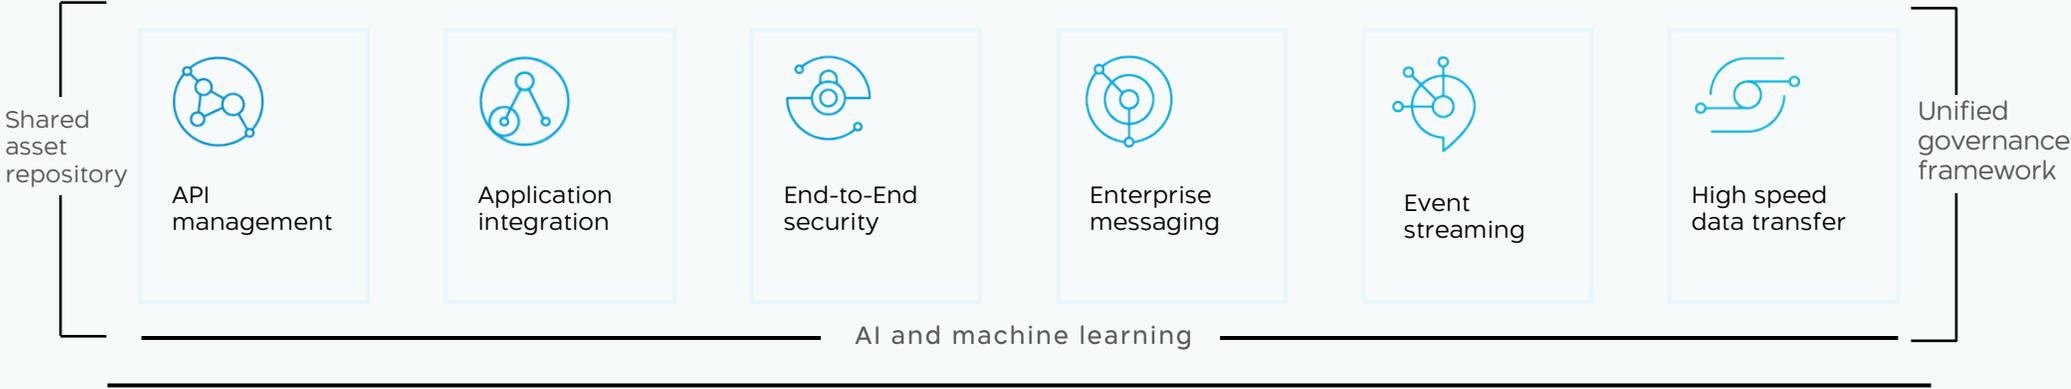

- Apply AI to operational data
- Classify and understand content
- Prioritize tasks
- Make predictive decisions
- Build intelligent chatbots
