

Within just the past couple of years, California’s new AI and data privacy laws have created risks—and opportunities—that nonprofits cannot afford to ignore. A single data breach or compliance failure, especially involving AI, can now result in immediate shutdown, loss of licensure, and ongoing legal penalties. This is not hypothetical; it’s happening now, and the vulnerability is new, urgent, and often misunderstood.

Our Mission: We’re here to empower your organization to safely, ethically, and affordably harness AI—while ensuring you’re 100% compliant with California’s latest laws and best practices for 2025 and beyond.

What We Offer—All for Free

To help you prepare, we’re providing a comprehensive suite of PDF resources and services—valued at over \$1,000—at no cost to your organization. These materials are designed to protect your mission, your clients, and your future.

Why These Materials Matter

- **California’s 2025 regulations (AB 3030, AB 489, CCPA, CMIA, HIPAA) now require nonprofits to document AI use, mitigate bias, and protect client data—or face immediate and severe penalties.**
 - **A single violation—even once—can now result in shutdown. This is a new risk, only possible in the last few years due to rapid AI adoption and new legal standards.**
 - **Our PDFs and checklists are based on current market prices, with evidence from legal, compliance, and nonprofit sector vendors**
-
