

# BCKK Transport Committee

## Purpose & Scope

The BCKK Transport Committee evaluates transport and logistics policies, regulations, and infrastructure projects—assessing their impact on trade, mobility, and operations in Kosovo. It serves as the BCKK central information source and represents members' collective interests to government bodies, regulators, and public agencies.

## Our Aim

To enhance the effectiveness, safety, and sustainability of Kosovo's transport ecosystem—empowering BCKK members with insights, advocacy support, and opportunities to shape transport-related decisions and projects.

## Key Services & Activities

### 1. Policy & Infrastructure Monitoring

- Track proposals, regulations, and infrastructure initiatives across road, rail, air, and cross-border transport.
- Provide members with concise impact analyses and summaries.

### 2. Consultation Feedback & Advocacy

- Draft and submit formal responses to public consultations on transport matters.
- Engage with ministries, municipalities, customs authorities, and transport agencies on behalf of BCKK members.

### 3. Forums, Roundtables & Speaker Events

- Host events featuring transport planners, logistics experts, regulators, and infrastructure developers.
- Include Q&A panels to deepen member engagement and understanding.
- Establish temporary sub-committees formed around specific themes—cross-border transit, urban logistics, rail freight modernization, or infrastructure project feedback.

### 4. Workshops & Site Visits

- Organize field visits locally and internationally to ports, logistics centers, and transport terminals and infrastructure works.
- Conduct training on customs procedures, urban transport planning, and efficiency best practices.

### 5. Member Alerts & Publications

- Issue transport alerts on route changes, permit/licensing updates, border processes, and infrastructure opportunities.
- Publish regular newsletters capturing sector trends, upcoming projects (e.g., SEETO/Transport Community efforts in the Western Balkans), and government updates.

### 6. Networking & Stakeholder Collaboration

- Facilitate introductions between members and key stakeholders: transport agencies, infrastructure developers, logistics firms, and PPP project managers.
- Encourage partnerships for addressing transport, warehousing, and customs bottlenecks.

## 7. Member Support Services

- Provide guidance on transport licensing, permitting, customs clearance, and logistics planning.
- Offer referral services to advisors—such as transport consultants, customs brokers, or legal counsel.

## 8. Hands-On Issue Resolution

- Coordinate action to address specific transport challenges, e.g., congestion at border crossings or terminals delays.
- Support transport-related infrastructure improvements like staging areas, truck parking zones, or route diversions.

### Strategic Impact

By keeping members informed on transport policies and infrastructure projects, facilitating stakeholder engagement, offering support services, and coordinating practical interventions, the BCCK Transport Committee ensures members effectively influence and benefit from Kosovo's evolving transport landscape—enhancing trade, connectivity, and business competitiveness.
