I am so so so impressed with the level of organization in discord server, the idea of having specific channels to study , to ask , to read even to share memes and to celebrate our daily wins creates this enjoyable atmosphere that helps so much to gain the most benefit. being in such a community actually changes my mindset and keeps me always curious to know why .

It's only 10 days till now but it already added so much to my knowledge and I'm sure there will be more , I do trust the learning curve

I am so thankful for Dr Mahmoud El-Gammal for your patience, continuous support and for creation such a community that I am grateful to be part of

What comes fast goes fast..
But with this community the most important thing is the learning curve
You take the information with its all dimensions why. how. when . . . so you will never forget it
With this community you learn not to be a blind dentist but a 8K vision with your mentality
All thanks to dr. Mahmoud El-Gammal
