Startrit Infratech Pvt. Ltd.

Governance 360 Framework

**A modular and scalable platform
designed to digitize, automate, and
optimize government operations
across departments**

Startrit Infratech Pvt Ltd's Governance 360 Framework

A modular and scalable platform designed to digitize, automate, and optimize government operations across departments

Key Challenges faced by Government departments

Fragmented Workflows

- Dependence on paper-based or semi-automated systems
- Disconnected processes across departments

Data Blind Spots

- Manual data entry limits real-time visibility
- Lack of centralized data reduces decision quality

Pain Areas

Inefficiency & Cost Overruns

- High administrative overhead and time-consuming processes
- Delayed public service delivery impacts citizens

Security & Coordination Gaps

- Weak audit trails and cybersecurity vulnerabilities
- Limited collaboration between government departments

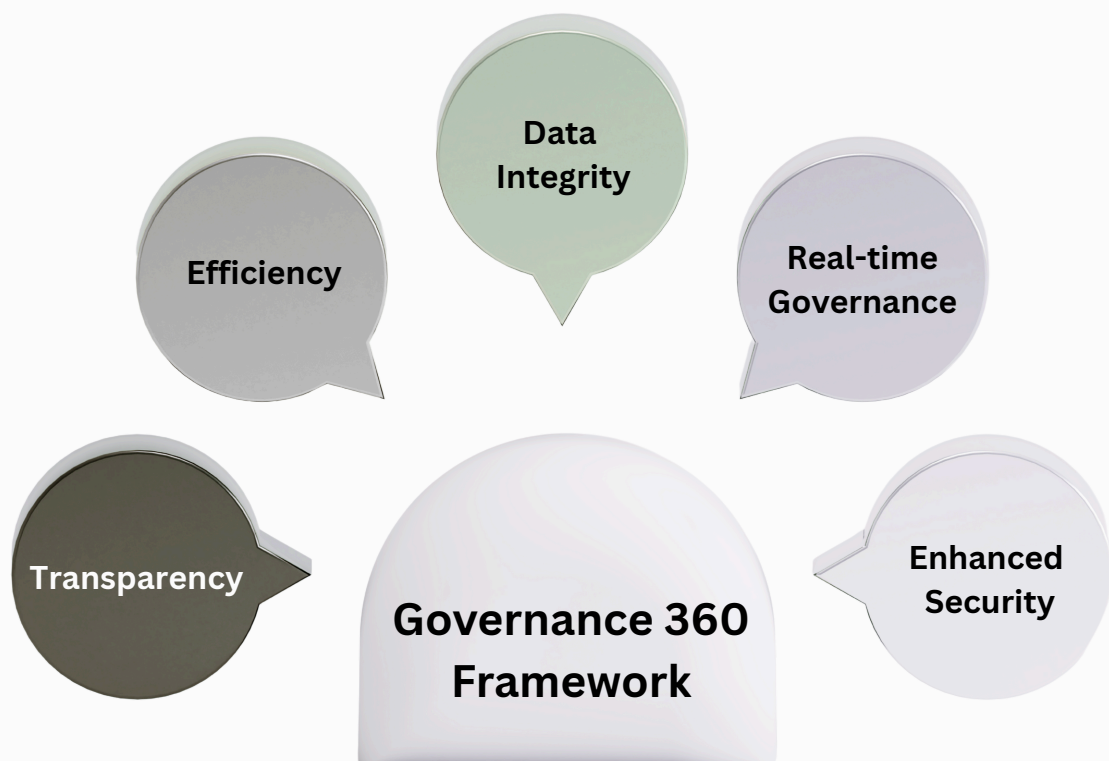

Startrit Infratech Pvt Ltd's Governance 360 Framework

A modular and scalable platform designed to digitize, automate, and optimize government operations across departments

Governance 360 Framework Overview

Whether it's a municipal body, a transport ministry, or a national finance department, **our solution adapts to local workflows**, complies with public policy frameworks, and **integrates** with existing systems **seamlessly**.
