**Advanced Nurse Practitioner Non Primary Care, District & Community,
Care Home, Oncology, Palliative Care & Tissue Viability Expert Witness**

General Background

Currently working as Clinical Nurse Specialist (CNS) and Case Manager in End of Life and Palliative Care. Has extensive expertise in palliative care, tissue viability and district nursing as well as the assessment, planning, implementation and evaluation of patient care.

At present working as a Clinical Nurse Specialist in symptom management in End of Life and palliative care, which also includes managing a team of carers working over 24 hours caring for patients in their last few days of life. Helps to manage a 24-hour advice line for medics for advice on medicine management in the community setting and in the acute trust. As a prescriber, calculates and titrates medication/drug doses for symptom management of palliative and end of life patients. Mentors junior staff, paramedics and student nurses in End of Life, Tissue

Viability, medicine management and comorbidities. As a clinical lead in classification of wounds and pressure ulcers I have also taken on the role of teaching this for clinical updates of staff. Has over 25 years' experience as a Community Nurse and qualified as a

District Nurse 15 years ago. Is able to combine work in palliative care with District Nursing, thus maintaining competency in this field, including regularly updating tissue viability competencies – an area of specialism whilst studying for BSc. In addition, provides training and competency assessment for community nurses including syringe drives, medicines management, symptom control.
