Neurological Physiotherapist Expert Witness

General Background

Catherine is a Neurological Physiotherapist with experience dating from 2008. She has worked with paediatric and adult clients with neurological and orthopaedic conditions as well as amputations. She works closely with carers, nurses, occupational therapists, social workers, case managers and families to coordinate care and treatment plans. Catherine visits clients in their own homes as well as in day centres, hospital and schools. She completes home environmental assessments prior to provision of equipment. Currently, she has two roles. She works as a domiciliary physiotherapist visiting client with a variety of conditions in their own homes.

She also works in a specialist wheelchair service, ensuring clients have equipment which optimises their pressure, mobility and postural needs. In 2023, her passion for 24-hour postural management led her to achieve a Distinction in a 'Posture Management for People with Complex Disabilities' Postgraduate certificate. Catherine's specialist skills include 24-hour postural management, pressure care, wheelchair seating, spasticity management, casting and splinting, tracheostomy weaning and respiratory care and suctioning. In addition to her neuro expertise, she has experience in hydrotherapy and with amputees in acute and rehabilitation settings. Catherine prides herself on completing thorough and objective assessments and keeps up to date with the latest evidence base and clinical guidelines.

Expert Witness Background

Associated with AMG Medico Legal Limited (Formerly AMG Consultancy Services Limited) acting in the capacity of expert witness in a specialist field of physiotherapy. Able to utilise professional skills and experience so that the standards of care can be considered and identify any breaches in those standards. If any breaches have been identified, then offer an opinion as to whether those breaches are the most likely cause of injury. Able to provide opinion on Quantum, recommend specific physiotherapy treatments and/or prepare care reports following alleged or proven clinical negligence or personal injury.
