ABOUT ME

" Hello! My name is Diana, I'm a Multimedia Designer from Porto. In everything I do I always try to acquire more knowledge and evolution both personally and professionally. I consider myself a fun person always ready for new challenges!"

01
Design

In this area, I present some of the projects that marked my university and professional progress.

02
Photography

Of all the means of expression, photography is the only one that forever fixes the precise moment. This is one of my big passions.

03
Multimedia

In high school I developed a huge interest in web design, game development and social media management.

WHAT? I CAN'T?

Every person has their own **universe**
don't try to change it

01

"What? I can't?"

"What? I can't?" is an advertising campaign to raise awareness of gender equality.

In this project I used celebrities who suffered from discrimination by society regarding their gender / beliefs.

"Each person has their own universe, don't try to change that."

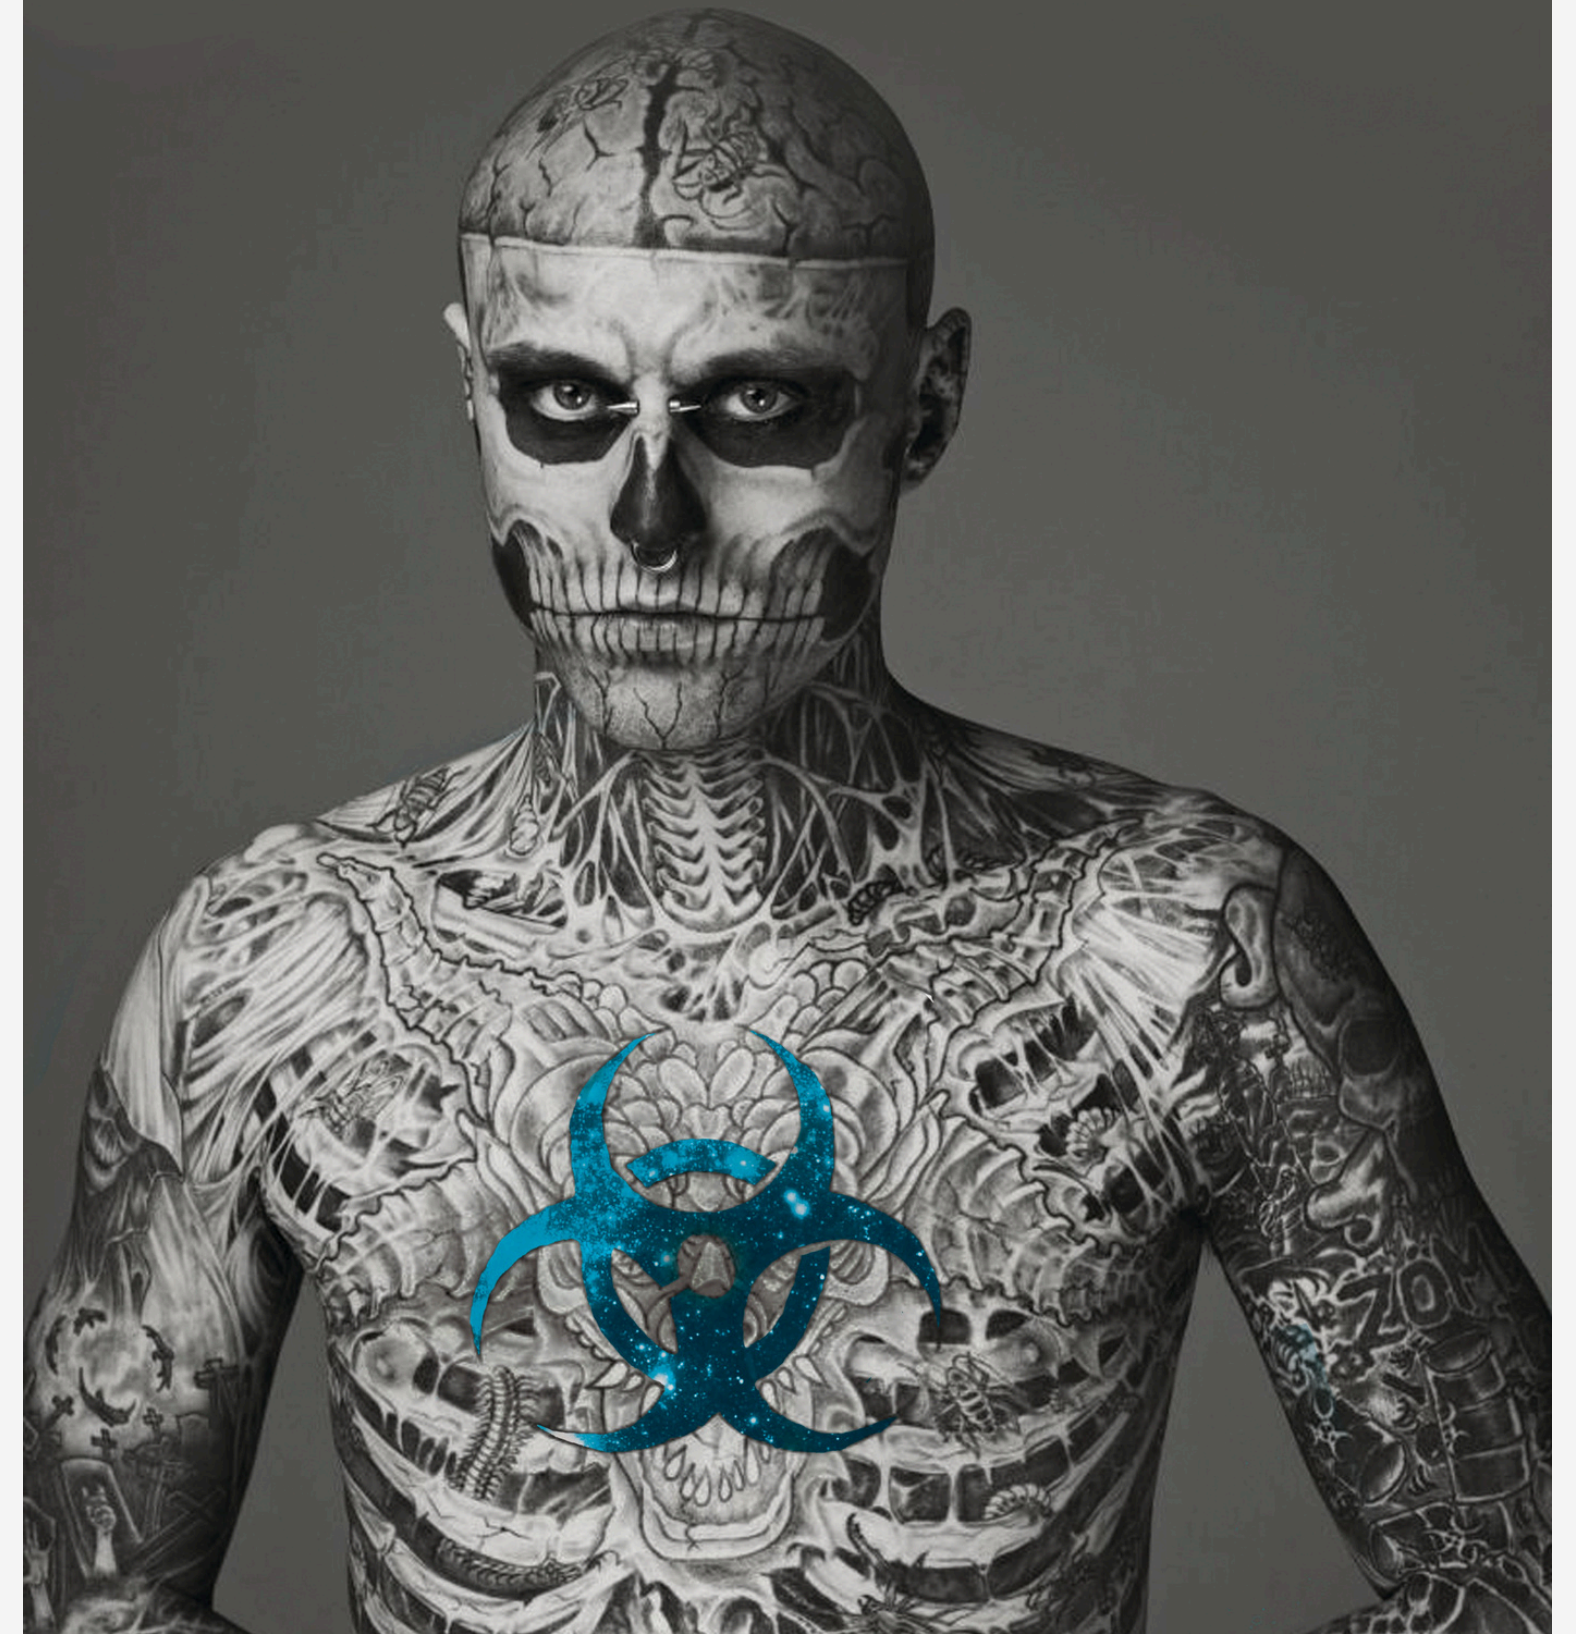

WHAT? I CAN'T?

Every person has their own universe
don't try to change it

The brand "Float" appears through its equipment, comfort and safety. For the creation of the logo I focused on these two points. The word "float" is mainly based on comfort, as the user will feel as if he is floating. The logo's snowflake is presented as a base/support that means security. .
