

PLAYER INTELLIGENCE PROGRAM

Professional Performance Intelligence

Total Soccer Academy (TSA) combines FIFA-approved GPS technology from STATSports with elite-level performance analysis to deliver objective insights that impact training design and match preparation.

This supplemental system enhances club, high school, college, and semi-professional environments by providing measurable intelligence for individual athletes competing within team structures.

Built for Individual Players in Team Environments

Performance data is designed to be shared with team coaches and conditioning trainers to align workload, match demands, and physical development.

What We Track

- Total Distance
- High-Speed Running (HSR)
- Sprint Output
- Acceleration & Deceleration Load
- Match Intensity Trends
- Tactical Heat Maps
- Fatigue Management
