

Providing Excellent Solutions For Fire Safety In The Mining Sector

Breakthrough The Challenges In The Mining Field

Unlike any other sector, mining is a league of its own. It requires special qualifications and methods tailored to the unique challenges of the mining industry.

Adhering to the strict TKDN standard and construction engineering process, FAST created a special division FIRST [Fastindo Intiraya Solusi Tambang] to answer fire safety challenges for mining companies in Indonesia with holistic approach and excellent services, while carrying our proudly local-made products.

FLAT
FLAME ACCURATE TERMINATION

FLAT HARTINDO AF11E

FLAT [Flame Accurate Termination] Hartindo AF11E is a ground-breaking clean agent that is meticulously crafted to mirror the effectiveness of Halon without its toxicity and environmental concerns. It is bromine-free and CFC-free, it even outperforms other halocarbon alternatives and serves as a 1:1 halon replacement. FLAT Hartindo AF11E is a liquid gas, thus it is safe to be applied to electrical devices and causes zero damaging residues.
