

Microsoft **Office** on premise vs. **Office 365**

Here is the main difference: Office on premise is the traditional Microsoft Office product (exchange/outlook), sold for a one-time, up-front fee. You pay once to buy a version of Office on premise latest version, you can install on a single PC or Mac and use for as long as you like. There's no expiration date.

Office 365, on the other hand, is the new way to buy Microsoft Office (outlook/exchange emails, word, excel, etc). Rather than paying a hefty up-front price, you pay a monthly or yearly fee and get access to the latest version of Office.

What is Office 365? Office 365 is an integrated experience of apps and services, designed to help you pursue your passion and grow your business. Get apps like Word, Excel, PowerPoint, and more, updated monthly with the latest features and security updates.

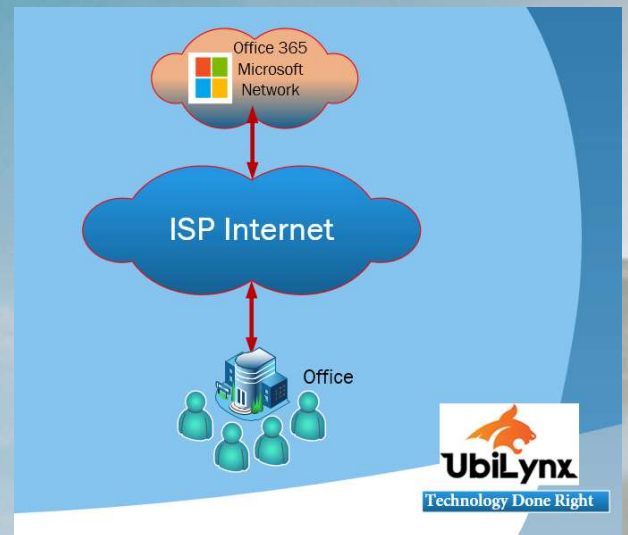

Use cloud-powered email (exchange/outlook in the cloud) to reach customers and coworkers wherever work takes you. Available anywhere you have access to the internet.

Collaborate in Microsoft Teams, the new hub for teamwork where you can chat, organize meetings, and share files.

Save files to OneDrive with one terabyte of online storage, allowing access across devices and on the go.

An engineer will sit down with you to review your company office requirements and provide a project plan and scope of work to migrate your Exchange/Outlook users to the office 365 outlook solution in the cloud.
