

# Ubi-SIP Trunking

Ubilynx offers SIP Trunking Solutions that fit virtually any size business.

As a successful business, you're constantly searching for the next big thing. Whether you're a small business looking for the flexibility and cost savings of VoIP, or a mid-sized company looking for business continuity and flexible calling plan options, we'll help you save up to 40% over your traditional telephone services.

Session Initiation Protocol (SIP) is becoming the common signaling standard for your real-time communications that utilize VoIP (Voice over Internet Protocol). SIP enables you to seamlessly connect with your existing premise-based phone systems using our carrier class voice network.

We'll provide you with as many SIP Trunk groups as you need, with an unlimited number of pre-paid call paths. Also, you'll have the ability to bust up to ten additional call paths on demand for improved capacity planning.

## What is SIP Trunking?

SIP Trunking refers to the use of VoIP to connect your premise based phone system to the Internet. A broadband or Internet connection replaces traditional, plain-old-telephone (POTs) or Primary Rate Interface (PRI) lines, allowing your organization to communicate more efficiently with better scalability. SIP Trunking may be utilized with virtually any PBX system, including modern IP based phone systems or older styled analog systems. The older systems may require an integrated access device (IAD) to bridge the SIP connection to your PBX. Either way, SIP Trunking will bridge your company to the modern communications cloud, helping connect all office and mobile users together.

## How to Switch

Interested in switching to Ubilynx SIP Trunks? Call **630-344-9078** to receive a customized quote detailing the benefits of utilizing our innovative products and services. When you're ready, we'll install your new SIP Trunk or phone system with ZERO downtime, so you can get back to business.

## Benefits of Ubilynx Enhanced SIP Trunking

**Burstability:** The ability to burst above the number of pre-paid trunks or call paths on demand, automatically.

**Control:** As a customer, you'll be able to make changes to the platform as you need them, including scalability, API integration, an intuitive UI, and our future-proofed platform.

**Advanced Call Routing:** Enables customers with advanced routing capabilities including call forwarding, and call status (away, busy, unreachable, etc.).

**Multi-office Trunking and Business Continuity:** Aggregate your SIP Trunks to improve business continuity between office and leverage the savings that comes with pooling and centralizing your communication needs at the enterprise level. We'll even provide you with improved disaster recovery options so you can sleep soundly in the event of a shutdown or natural disaster.

### Benefits include:

- **Rapid Return on Investment:** SIP Trunking is cost-efficient to implement and CAPEX negligent, meaning businesses can maintain their same previous features at a fraction of the cost overtime.
- **Fast Geographic Growth:** SIP Trunking solutions combine voice and data to better connect distant business systems, helping companies establish faster, wider geographic growth.
- **Reduced Call Costs:** Enterprises can halve their telecommunications budget with Sip Trunking solutions by reducing costs for making and receiving calls — and since calls are made via IP connection, you won't have to worry about long distance charges.
- **Enhanced Scalability:** Unlike traditional POTs and T1/PRI lines that require planning for peak call times, SIP Trunking solutions offer the flexibility of on-demand scalability, meaning it can scale up or down as-needed, making it an ideal and scalable solution.
