

Portable Cold Room Solutions

Introducing the next generation of Portable Cold Rooms — engineered using advanced flexible insulated panels for rapid installation, mobility, and cost-effective cold storage.

Designed for agriculture, food distribution, pharmaceuticals, events, seasonal businesses, and emergency storage, these modular cold rooms provide reliable temperature-controlled storage wherever it is needed.

Setup within Hours — Not Days

Unlike conventional cold rooms that require permanent civil work and lengthy installation, our portable cold room system can be assembled quickly with minimal manpower.

Key Advantages:

- Rapid setup within hours
- No permanent construction required
- Easily relocatable and reusable
- Expandable modular design
- Minimal site preparation

The lightweight flexible insulated structure allows easy transportation and deployment even in remote or temporary locations.

Cost-Effective Cold Storage Solution

Traditional cold storage infrastructure often involves:

- High construction costs
 - Long installation timelines
 - Permanent space commitment
 - Expensive structural modifications
-

Smart Cooling for Modern Storage

Our portable cold room system is designed for:

- Seasonal agricultural storage
 - Emergency backup cooling
 - Remote site deployment
 - Temporary warehousing
 - Event & catering refrigeration
 - Mobile cold chain operations
-

A compact, scalable, and efficient cooling solution—engineered to deliver performance where it matters most.

SEASONAL COLD STORAGE FOR FRUITS & VEGETABLES – BUILT TO PRESERVE, MADE TO LAST

Keeps Produce Fresh Longer

Reduces Spoilage & Waste

Maintains Ideal Temperature

Secure. Insulated. Reliable.

1

BASE FRAME SETUP

Assemble the strong base frame for a stable and durable structure.

2

INSULATED WALL INSTALLATION

Install high-performance insulation panels to maintain consistent cold temperature.

3

WALLS COMPLETED

All insulated walls are in place for maximum thermal efficiency.

4

OUTER COVER INSTALLATION

Add the heavy-duty, weatherproof cover to protect from sun, rain & dust.

5

SECURE THE COVER

Tighten and secure the cover for wind resistance and long-lasting protection.

6

DOOR INSTALLATION

Install the insulated door for easy access and minimal temperature loss.

7

FINAL CHECK & SEALING

Check all seals and joints to ensure the unit is airtight and leak-free.

8

COLD STORAGE READY

Your seasonal cold storage is ready to keep fruits & vegetables fresh for longer.

IDEAL FOR

Fruits, Vegetables, Flowers, Dairy & Other Perishables

TEMPERATURE RANGE

Customizable as per requirement (0°C to 15°C)

BUILT FOR FARMERS & BUSINESSES

Affordable. Durable. Efficient.

PRESERVE QUALITY.
REDUCE LOSS.
INCREASE PROFITS.
