Work Experience:

Next Generation Services, Inc.; Huntington Beach, CA; President; 2/84 - Present

Next Generation Services focuses its efforts in two complementary areas. Within the scientific and professional diving community, responsibilities include the development and support of scientific diving programs for universities, government agencies, and non-governmental organizations; service on multiple Diving Control Boards (DCBs); underwater education and training from entry-level through advanced technical and scientific diving; and the application of advanced diving technologies and methods to enable safe access to remote and extreme environments. Additional activities include technical development of underwater equipment and devices; preparation and publication of texts, standards, and articles across a range of professional media; and limited consultation related to diving safety, accident investigation, and equipment performance.

Outside the diving sector, the company provides business development, market expansion, and financial modeling services, including management consulting, training, governance design, membership program development, and fundraising. Clients have included the American Red Cross, PacifiCare Health Services, Toshiba, Boeing, Gulton Industries, AgeSolutions.com, and VisionArt Interactive. Results include leading multiple successful capital raises totaling over \$1 million and supporting client growth exceeding 500%.

Carbon Company, Inc.; Huntington Beach, CA; Chief Financial Officer; 2/96 – 2/98

Waste coal electrical power generation company. Responsible for budgeting, financial forecasting, and all due diligence compilation and filings for an Initial Public Offering (IPO). My efforts were directly responsible for financing commitments for \$250 million, but the project terminated due to irregularities I identified during the due diligence process.

Aquarius Research International, Inc.; Costa Mesa, CA; Management Consultant; 9/80 – 1/89

ARI provides engineering and management support for new technologies in natural resource utilization. Primary activities relate to fish protein concentrate (FPC) projects for Mexico and other developing countries. Responsible for project proforma analyses, financial modeling, project planning, linear programming analyses, background research and participation in international contract negotiations. My financial modeling efforts were an integral part of the package presented for financing, resulting in \$3 million in contract commitments.

Antarctic Support Associates, Inc.; Englewood, CO; Dive Technician; 7/91 - 5/92

Company provides logistical support for the United States Antarctic Program. Responsibilities included overseeing all National Science Foundation (NSF) funded research diving activities, evaluating equipment for polar diving, organizing and supervising the water oriented search and rescue team, supervising the recompression chamber crew, maintaining the recompression chamber, and reviewing Palmer Station diving operations. Personal research efforts during the period resulted in publication of the first edition of the Antarctic Research Diving Manual, several scientific papers on the function and reliability of diving equipment in polar diving conditions, and initial work towards a slide library of Antarctic fauna as an aid to other researchers.

Antarctic Services, Inc.; Paramus, NJ; Dive Technician; 9/89 - 4/90

Oversaw all NSF funded research diving operations at McMurdo Station, Antarctica. Tasks included research diving, equipment maintenance, conducting orientation dives, and maintaining the recompression chamber.

University of Miami, Rosenstiel School of Marine and Atmospheric Sciences; Miami, FL; Research Asst; 12/82- 6/83
Provided proposal outline, work breakdown structure, task descriptions, scheduling, and team participants analysis for the Advanced Ocean Drilling Project with JOIDES/NSF, a large-scale multi-year research contract.

Interpipe Oil Services of Bolivia, S.A.; Santa Cruz, Bolivia; Geologic Consultant; 11/79 - 9/80
Acting as project manager, I was responsible for the establishment of an entirely new division of the company in mining and production of placer gold. Duties included equipment selection and purchase, on-site delivery and installation, training of personnel, and initial field operations of underwater placer gold mining operations.

Education:

Madison University	Ph.D. Education	2003
University of Miami	Doctoral studies in Oceanography	1982-84
University of California, Los Angeles (UCLA)	MBA, International Marketing	1982
Humboldt State University (HSU)	MA, Environmental Education	1980
	BS, Geology	1979
Santa Ana College	AA, Underwater Technology	1978
University of California, Irvine (UCI)	Engineering/Physics studies	1974-77

Professional Positions:

Research Associate, Natural History Museum of Los Angeles County – Collect biological specimens for the Echinoderm and other invertebrate departments, with efforts contributing to the description of several new species. Conduct fieldwork to expand regional marine flora and fauna representation in the museum's research collections, with particular emphasis on understudied habitats including mesophotic (twilight zone) reefs, submarine cave systems, and polar marine environments. Appointed 2006.

National Advisor Diving, National Park Service – Provide consultative services to the National Dive Control Board and various Regional Diving Officers of the National Park Service, United States Department of the Interior. Work with a variety of NPS dive programs. Appointed 1993.

Member, Diving Control Board, Aquarium of the Pacific-- Board sets diving policies and guidelines for public aquarium and associated marine research program. Appointed 2012.

Editor, Immersed Magazine – Immersed serves as an international forum for content dealing with advanced and technical diving technologies and activities. 2004-05.

Member, Board of Directors, AAUS -- The American Academy of Underwater Sciences is a non-profit professional organization formed for the purposes of promoting exchange of knowledge among diving scientists. It also sets standards under which scientific diving is conducted in the United States, providing the basis for reciprocity between different academic and scientific involved in scientific diving. Chairman, Audit Committee, 1993-94. Position on Board, Membership Chairman, 1994-95, Treasurer 1995-99. Technical Diving Committee 2000-2003.

Member, Board of Directors, International Underwater Cave Rescue & Recovery, Inc. (IUCRR) --Group which assists law enforcement agencies in rescue attempts, body recoveries and accident investigation in underwater environments outside their capabilities. Directly responsible for the collection and dissemination of data related to technical diving incidents and fatalities. 1984-1999 under prior name of National Cave Rescue Commission; 1999– present known as IUCRR. Board of Directors, 1999-2020.

Vice-Chairman, Member, Board of Directors, NAUI -- NAUI is an international professional organization that certifies scuba diving instructors, sets training standards, and distributes educational materials. Term on Board of Directors 1988-95, Treasurer 1989,92; Vice Chairman 1990-91, Chairman Bylaws Committee 1988-93, Chairman Nitrox Committee 1989-92, Chairman Finance Committee 1992, Strategic Planning Committee 1988-93.

President, Board of Directors, IUF -- The International Underwater Foundation is a 501(c)3 corporation, with the primary purposes of sponsoring research in underwater educational development, and promoting marine conservation. Term on Board of Directors 1993-97, President 1993-94. Achievements included drafting new bylaws, defining a new governance model, and fostering consensus among a diverse membership leading to the adoption of a mission statement.

Chairman, Board of Directors, NSS-CDS -- Term on Board of Directors 2007-09, 1984-89. The NSS-CDS is a non-profit charitable institution as defined under IRS laws Section 501(c)3 promoting the conservation and study of submerged caves. Members define standards and conduct training programs instructing interested members of the public to safely access the environment. Membership exceeds 500. Vice-Chairman 1986-87, Chairman 1988-89.

Member, External Review Committee, SRD, NOAA -- The Sanctuaries and Reserves Division of the National Oceanographic and Atmospheric Administration is responsible for oversight of the National Marine Sanctuary Program. The External Review Committee provides input into the formation of policies that direct the development and growth of the sanctuary program. Appointed 1993.

Member, Board of Advisors, IANTD -- Reviews and sets training standards for the International Association of Nitrox and Technical Divers, the largest technical diving agency in the world. 2001-2017.

Member, Board of Advisors, TDI -- Reviews and sets training standards for Technical Diving International, as well as reviewing/editing training manuals and textbooks. Appointed 2005.

Supervisor, Catalina Hyperbaric Chamber -- Responsible for conducting Hyperbaric chamber operations at an emergency facility which treats primarily diving illnesses. Collateral duty includes training chamber operators, running chamber operations courses, and assisting with Emergency Dive Accident Management courses on a periodic basis. Work is conducted under the Program Director. Directly involved in the treatment of about 25 diving accidents (including both DSC and AGE). 1989-present.

Director, Island Caves Research Center, Inc. (ICRC) -- ICRC is a non-profit charitable institution that sponsors scientific investigations in submerged caves in coastal environments. It also conducts field research courses at various levels. Have participated in many expeditions conducted under the auspices of ICRC, serving as Diving Safety Officer on those expeditions. Team efforts have resulted in the collection and subsequent identification of approximately 200 new species, four of which have been named after me.

Chairman, Accident Files & Analysis Committee, NSS-CDS & NACD -- Collect and analyze cave diving fatality data, With the objective of increasing the safety of cave and cavern diving. Appointed NSS-CDS 1996, NACD 1999.

Member, Training Committee, NSS-CDS -- Initiates and reviews all training standards, procedures, and materials for the NSS-CDS. Term on committee 1983-94.

Chairman, Board of Governors, NDA -- The NAUI Diving Association is a 501(c)3 corporation which differs from NAUI in that the membership is open. Term on Board of Governors 1988-95, Chairman 1991-92. During term was responsible for revision of Bylaws, Mission Statement, and general reorganization.

Member, Technical Standards Committee, NAUI--Drafting standards for technical diving instruction courses. 1997-2003.

Cave Diving Coordinator, Diving and Water Rescue Committee, National Association for Search and Rescue--
Responsible for development of standards and coordination of efforts regarding rescues from partially or completely water filled caves for NASAR. 1989-94.

Member, Diving Control Board, Rosenstiel School of Marine and Atmospheric Sciences, University of Miami--Board set diving policies and guidelines for major oceanographic research program. 1983-4.

Member, Diving Control Board, Wrigley Marine Science Center, University of Southern California -- Board sets diving

policies and guidelines for marine research program. Served as Diving Safety Officer (1993) for the program, which has about 200 active divers. 1993, 2015 to present.

Member, Executive Board, Orange County Council of the Boy Scouts of America – Council oversees professional Scouter staff and indirectly adult volunteer Scouters. Council supports about 20,000 youth and 10,000 adults. Term on Board 2018-2020.

Western Territories Coordinator, Boy Scouts of America Alumni Association, Council Support Committee – Committee assists all Western territories (NST-1, 2, 3) councils (Q49) with their Alumni and NESA (National Eagle Scout Association) committees, including helping them form committees if they do not have them. I manage a team of eight members in this task, as well as direct outreach to councils. 2020-22. Committee member 2023-24.

Chairman, National Eagle Scout Association (NESA) Scholarship Selection Committee for NST-3—Solicits, reviews, and evaluates applicants for multiple college scholarships available to Eagle Scouts. Member of Western Region Committee 2020-22, 2024-25. Chairman 2021.

Member, Board of Directors, The Bucket List Project Foundation –BLPF funds and operates a wish fulfillment program for individuals 18 years and older with life-limiting illnesses and limited resources. Community Engagement Chair. Appointed to the Board 2021.

Member, Diving Control Board, California Science Center-- Board sets diving policies and guidelines for public aquarium and associated marine research program. Appointed 2022.

Member, Diving Control Board, Junior Scientists in the Sea, Panama City, FL -- Board sets diving policies and guidelines for marine research and scuba training programs. Appointed 2025.

Member, Board of Directors, Junior Scientists in the Sea, Panama City, FL – Their mission is to introduce young individuals to a purposeful and educational program, enriched by hands-on training, diligent effort, and fun. Appointed 2025.

Expeditions and Research Activities:

Blue Holes '83 Expedition, Bahamas--Joint British/American Expedition to explore, survey, and conduct initial ecological studies in the blue holes on East End, Grand Bahama Island. Responsible for collection of hydrological and biological data in submerged caves.

1984 Canary Islands Expedition, Spain--Continuing studies of submerged lava tube caves, with primary emphasis on the indigenous species of Remipedia. Funded by the National Science Foundation (NSF). Collected biological material.

1983-84 Doctoral Research, Bahamas--Primary studies in ground water hydrology and effects on diagenesis of carbonate platform. Data collected from submerged cave systems on Grand Bahama Island. Secondary data collection tasks included surveying, collection of biological material for other researchers, and ecological observations. Partially funded by the United States Geological Survey.

1985 Cave Faunal Study, Palau--Exploration and faunal research in the inland and marine caves of Palau. Also conducted research in submerged caves in Guam and Hawaii while en route. Five month study partially funded by the NSF and ICRC. Collected geological, hydrological, and biological material; supervised diving activities; kept research records.

1988 Point Sur Bank Expedition--Studied biology and geomorphology of Point Sur Bank, California. Conducted by Cordell Expeditions, Inc. Worked as research diver and safety diver.

1989-1990 Dive Locker Technician at McMurdo Station, Antarctica--Participated in a diving support role on several projects, including tasks involving biological, hydrological, and ice research. Initiated and directed projects evaluating reliability of dive regulators and computers in polar waters.

1990 Nullarbor Plains, Australia Hydrological Study--Hydrology and geology data collection from multiple cave locations in the Nullarbor Plains. Responsibilities included data collection and record keeping, equipment maintenance, and photographic documentation. Sponsored by the University of Sydney and the University of Melbourne.

1990 Alijos Rocks Expedition--A multidisciplinary project examining the geography, submarine topography, geology, and biology of the Rocas Alijos island group in Mexico. Responsible for ariel and subtidal geologic sampling, photodocumentation, data collection, and establishment of safety lines on the vertical rock faces. Sponsored by Cordell Expeditions.

1991-1992 Dive Locker Technician at McMurdo and Palmer Stations, Antarctica--Participated in a diving support role on several projects, including tasks involving biological, hydrological, ice, and pollution research. Continued data collection for projects evaluating reliability of dive regulators and computers in polar waters. Initiated and collected preliminary data utilizing Doppler monitoring of research divers.

1984-1992 Continuing studies in the Bahamas, Turks and Caicos Islands, and Cayman Islands. Biological research in submerged caves. Funded by ICRC. Supervised divers, collected data, and kept research notes.

1984-05 Continuing studies in Cozumel and Yucatan Peninsula, Mexico. Exploration, surveying, cave ecology, faunal studies, archeology, and geochemistry studies. Funded by ICRC and the Government of Mexico. Supervise diving activities, participate in research dives, and keep research records. During the past year have been working with the Government of Mexico Underwater Archaeology Department, recovering Mayan pottery pieces from two sites in Cueva Quebrada. In appreciation, one of the sites was named "Bozanic Site."

1992 Alijos Rocks Expedition. Follow on studies to the 1990 expedition, also sponsored by Cordell Expeditions.

1992 Speleological research in Cuba, conducted in conjunction with the 2^o Caribbean Speleological Symposium. Objectives included preliminary investigations in local cave adapted biology, hydrology, geology, and exploration. Funded by ICRC, NSS, NSS-CDS, and the Government of Cuba.

1990-93 Wrigley Marine Science Center, University of Southern California. Participated in a wide variety of research diving projects in temperate kelp environments. Projects primarily associated with long term ecological monitoring related to El Niño events.

1994 Speleological research in the Philippines. Preliminary site reviews in Bohol and Panglao. Biological collections and water chemistry analyses.

2000 Brazil Cave Survey. Site evaluations of aquatic caves in the Bonito region of Brazil. Video and photographic documentation.

2003 B-29 Bomber Survey. National Park Service project to survey and document a B-29 that crashed in Lake Mead in 1948. Responsible for training the diving archaeologists, and providing on-site dive supervision. Wreck is located in 180 ffw in a high altitude environment.

2004 Schmieder Bank Expedition--Studied biology and geomorphology of Schmieder Bank, California. Conducted by Cordell Expeditions, Inc. Worked as Diving Safety Officer and research diver.

2004 Dominican Republic Cave Survey—Site evaluations of caves in eastern Dominican Republic. Photographic and video documentation, faunal collections. At least one new species collected.

2005 Biscayne Bay Cultural Resources Evaluation. Evaluation of submerged cultural resource sites for the National Park Service following hurricanes Katrina and Wilma.

2006 Montezuma's Well—Geologic and hydrologic studies and photographic / videographic documentation of a natural sinkhole used by a variety of prehistoric cultures as a residential site. Conducted under the auspices of the U.S. National Park Service.

2006 Lake Mead Natural Resource Area Cultural Resources Evaluation. Documentation of a variety of sites of cultural interest flooded by the waters behind Hoover Dam. Included the Batch Plant and Clarifier used for dam construction, the B-29 ditched in 1948, and other locations. Conducted under the auspices of the U.S. National Park Service. Multiple on-site deployments.

2007 Clipperton Island, France. Water chemistry investigations of the lagoon, fish and echinoderm collection. Primary scientific coordinator for the team.

2008 Beagle Channel, Argentina and Chile. Faunal collection for research collections.

2009 Antarctic Peninsula. Faunal collections for Natural History Museum of Los Angeles.

2010 Clipperton Island, France. Fish and echinoderm collection. Primary scientific coordinator for the team.

2010 Curacao. Faunal collections for Natural History Museum of Los Angeles.

2011 Florida Keys National Marine Sanctuary: Faunal collections for Natural History Museum of Los Angeles.

2011 South Georgia Island: Faunal collections for Natural History Museum of Los Angeles.

2012 Boesmansgat and Durban, South Africa: Faunal collections for Natural History Museum of Los Angeles.

2013 National Park of American Samoa: Crown-of-thorns starfish eradication.

2016 McMurdo Station, Antarctica: Evaluating rebreather operation in polar environments. T-913, National Science Foundation Office of Polar Programs. John Heine, PI.

2017 California Sea Caves Survey. NOAA Ocean Exploration. Bob Ballard, PI.

2018 Osborne Bank Sea Caves Survey, Ocean Exploration Trust, Bob Ballard, PI.

2018 California Sea Caves Survey. Ocean Exploration Trust. Bob Ballard, PI (2 cruises)

2019 Maui, HI Echinoderm Survey. Faunal collections for Natural History Museum of Los Angeles.

2019 Antarctic Peninsula, Falkland Islands, and South Georgia Island Expedition. Faunal collections for Natural History Museum of Los Angeles.

2021 Antarctic Peninsula Expedition. Faunal collections for Natural History Museum of Los Angeles.

2023 Red Sea. Deep wreck exploration.

2023 Iceland/Greenland Expedition. Faunal collections for Natural History Museum of Los Angeles and the Icelandic Marine and Freshwater Institute.
