

Job Title: Front-End Developer - CV Cricket Software

Location: Hybrid

Job Type: Full-Time

Job Description

We are seeking skilled and enthusiastic front-end and back-end developers at the intern level to join our dynamic team for the development of innovative CV Cricket Software. As an intern, you will contribute to building, deploying, and maintaining a highly scalable, responsive, and AI-integrated cricket application. You will collaborate with the product, AI/ML, and cloud teams to deliver an optimized user experience, including real-time match analysis, player statistics, and live streaming.

Responsibilities:

- Design and develop dynamic, responsive, and user-friendly front-end interfaces.
- Work with technologies such as:
 - React.js, HTML5, CSS3
 - Modern UI libraries like Bootstrap or Tailwind CSS.
- Integrate front-end components with back-end services using GraphQL or REST APIs.
- Optimize the user interface for speed and scalability.
- Conduct unit testing for front-end code (e.g., using Jest or Mocha).

Required Skills for Interns:

- Basic knowledge of React.js, HTML, CSS, and JavaScript.
- Familiarity with responsive design principles.
- Understanding of API consumption (REST/GraphQL).
- Basic knowledge of debugging tools for front-end development (e.g., browser DevTools).
