

PROXIMA

FOR ENERGY SUPPLIES SERVICES

About us

We are a group of Syrian engineers, educated abroad and seasoned with international experience. Our careers have taken us across the globe—from China, North America, Nigeria, Sudan, Egypt , West Africa , Iraq , Oman , Algeria and the UK to Jordan. We also have extensive expertise operating in Syria, from the northern oil fields of al-Suwaydiya and Rmelan to the southern gas fields in the Homs countryside.

We have worked with the Syrian Petroleum Company (SPC) as well as leading international operators in Syria, including PetroCanada, Total, Shell, Gulfsands , Dublin ,and INA. Through partnerships with reputable service providers and with over 40 years of combined industry experience, we unite the deep-rooted heritage, values, and cultural insight of Syria with the technical excellence, efficiency, and precision of international industry standards.

We collaborate with reputable international companies that share our commitment to quality, safety, and innovation. We carefully select our partners based on their proven track record, advanced technologies, and alignment with industry best practices. By combining their capabilities with our local expertise, we ensure their solutions are effectively implemented and fully supported on the ground.

We seek to contribute to building the Syrian economy, delivering exceptional quality of work, prioritizing the safety of our personnel and partners, and ensuring the operational security of the oil and gas companies we serve

Vision

At Proxima, we serve the oil, gas, and energy sectors with advanced services and reliable supplies.

We combine over 40 years of international and local engineering experience with a deep commitment to Syrian values, safety, and operational excellence.

Through partnerships with world-class companies, innovative technologies, and specialized training, we deliver solutions that:

- Protect people and assets
- Enhance operational performance
- Support the sustainable economic future of our communities

Mission

To be the trusted energy partner in Syria and the region, uniting Syrian expertise with global innovation to deliver safe, sustainable, and high-value solutions that drive growth and resilience.

PROXIMA

Services

Oil & Gas

Integrated upstream and downstream services with international standards, ensuring efficiency, safety, and reliable operations.

Training & Capability Development

Practical leadership and safety programs designed to cut risk, boost reliability, and build stronger operational cultures.

Fiber Optic Monitoring

Advanced DTS and DAS solutions for flow, leak, and well integrity monitoring, combining innovation with on-ground expertise.

P R O X I M A

Oil & Gas

Drilling Operations

- Onshore drilling support
- Rig mobilization and maintenance
- Drilling fluids supply and waste management
- Directional drilling technologies

Oil & Gas

Workover Operations

- Well intervention and maintenance
- Completion repairs and enhancements
- Tubing replacement & fishing services
- Artificial lift installation

Oil & Gas

Pipeline Services & Integrity Management

- Pipeline cleaning, pigging, and gauging
- Leak detection & repair
- Cathodic protection systems

Oil & Gas

Refinery Inspection & Maintenance

- API standard inspections
- Non-destructive testing (NDT)
- Turnaround & shutdown services
- Corrosion control and coatings

Fiber Optic Monitoring

- Distributed Temperature Sensing (DTS) for real-time downhole temperature profiling
- Distributed Acoustic Sensing (DAS) for flow monitoring, leak detection, and seismic activity tracking
- Pipeline integrity monitoring using DTS/DAS for early leak detection and thermal anomalies in addition to 3rd party intrusion.
- Wellbore integrity and completion diagnostics through fiber optic strain and acoustic analysis
- Reservoir monitoring for temperature gradients and subsurface activity
- Integration of DTS/DAS data into unified asset management platforms for enhanced decision-making

Training and Capability Development

People power performance. Proxima designs practical training that cuts risk, lifts reliability, and keeps your teams and assets safe.

We diagnose needs on site, then build programs tailored to your operations and delivered in Arabic or English. Expect blended learning

(workshops, simulations, on-the-job coaching, micro-learning) and clear measures of transfer to the field.

Our aim is simple: learning that sticks. We space practice over time, anchor it in real jobs, and equip managers to reinforce new habits—so culture shifts and KPIs move.

Leadership & Supervisory Training

The leaders who transform operations aren't born they use learnable skills. We build those skills and practice them on the job

- Leadership for senior & middle managers
- Frontline leadership and supervisory essentials
- Effective conversations, coaching & intervention
- Risk-based decision-making & operational discipline
- Creating a speak-up culture (psychological safety)
- Building trust & credibility

Industrial Safety Training

Saving lives is the goal; performance follows. Our safety training cuts injuries that hurt reputation, slow production, and drive cost

- Hazard identification and risk control
- Incident investigation
- Emergency readiness and response
- Permit to work PtW, Job safety analysis JSA, and lock out tag out LOTO
- Improving safety culture

WHY CHOOSE US

At Proxima, we collaborate with reputable international companies that share our commitment to quality, safety, and innovation. We carefully select our partners based on their proven track record, advanced technologies, and alignment with industry best practices. By combining their capabilities with our local expertise, we ensure their solutions are effectively implemented and fully supported on the ground. We stand behind our partners' performance, guaranteeing that every product, service, and solution meets both international standards and the operational realities of our clients in the region.
