

How to use ERIS Smoke

Once you have downloaded ERIS Smoke App on your phone, tablet or Quest

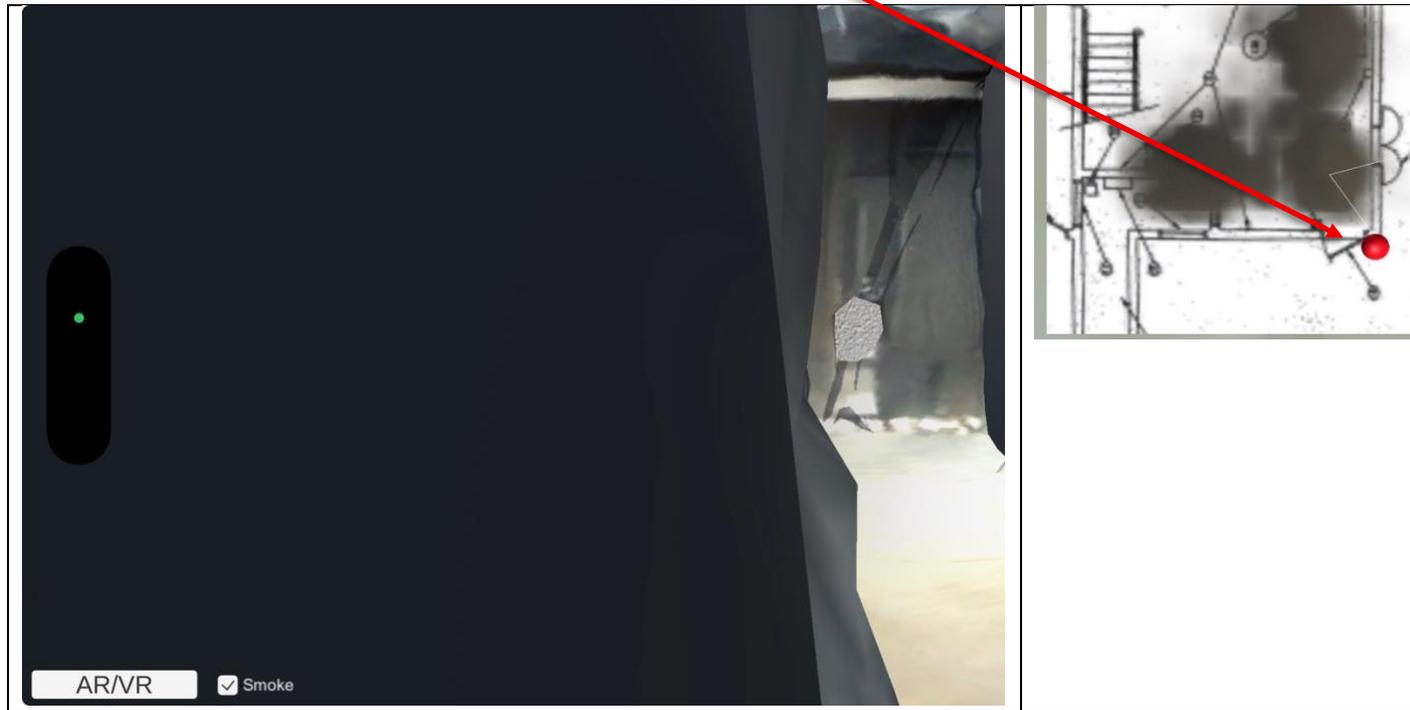

1. Align yourself on the right end corner of your building with a door close by so that you can enter the room you want to see the smoke in

Screen 1: The real environment before opening the app

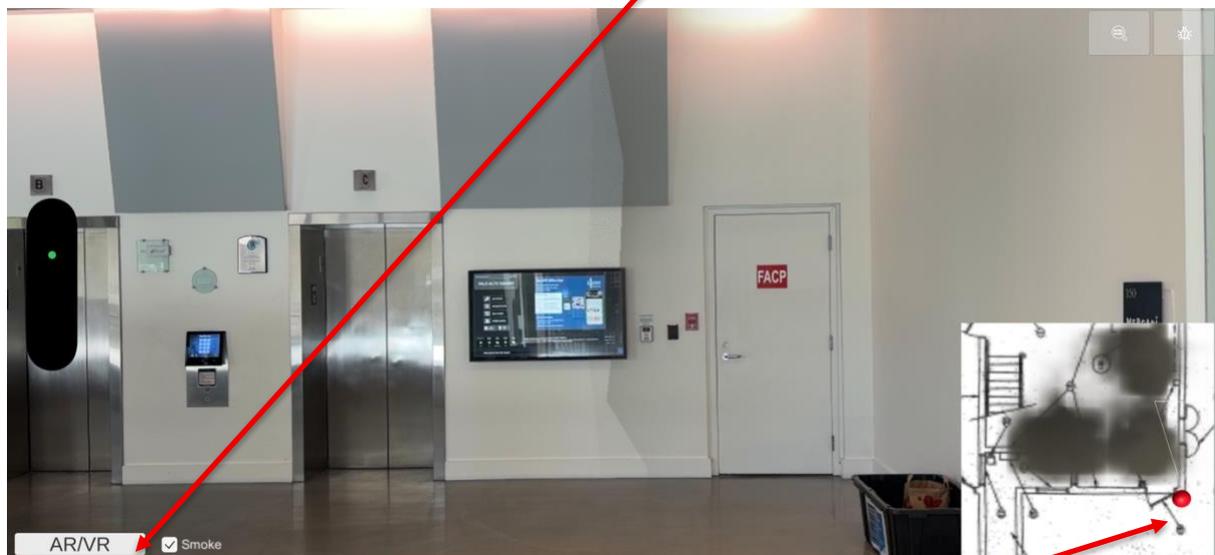

Open ERIS smoke holding your phone/Tablet holding your phone horizontally looking in front of you or just look in front of you wearing the Quest.

Screen 2: ERIS smoke is on with the 3D model and mapview showing your position

2. Click on AR/VR to make the 3D model disappear

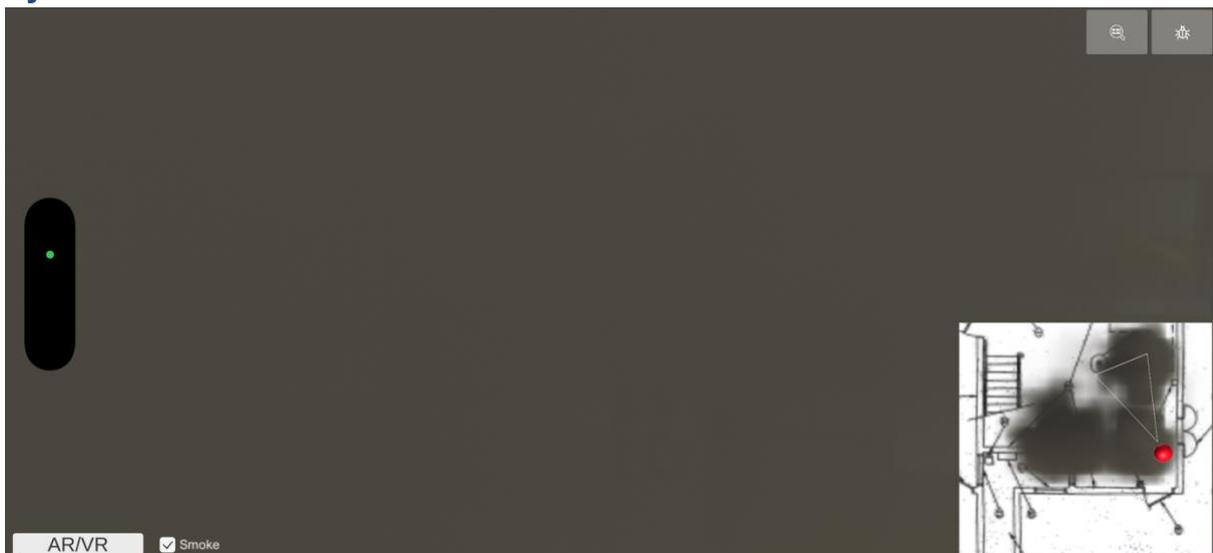

You are still outside at the right end side of the room

3. You enter the room through the door on your left and see the smoke propagating. The red dot shows your position within the room

4. Experience what lies beyond the smoke and experience variations in smoke density at both eye and ground levels.
