## Deep Red Profile Inspiration

Dark and romantic, this GenStone faux brick panel was inspired by the mysterious scarlet and vermillion hues of the Freedom Rose. The design team was enamored by this captivating flower's deep, wine-colored petals and felt inspired to create our Deep Red faux brick panel.

Living up to its name, GenStone Deep Red faux brick panels feature a bold red clay base infused with burgundy, terra cotta, and crimson highlights. Much like the stunning Freedom Rose itself, these panels will add romance, charm, and stylish elegance to your project. Try it at home by ordering your sample today.
