# Pharmaco- genomics Testing

## Personalized Medicine For All

[www.gdilabs.com](http://www.gdilabs.com)

**Have you ever questioned why a medication did not work for you?**

**The answer may be based in your genetics.**

**Pharmacogenomics can be used in following:**

- Neurology
- Psychology
- Pain Mangement
- Cardiology

and more

**Some drugs can work better for some people and not for others, this test can tell us why.**

Results in 5-7 days

---

Done with a simple cheek swab

**Allows for quicker, more efficient treatment.**

Pharmacogenomics uses information about a person's genetic makeup, or genome, to choose the drugs and drug doses that are likely to work best for that particular person.
