Location: Orillia Cardiac Care, 31 Frederick St, Orillia, ON

Department: Diagnostic Cardiology / Echocardiography

Position Type: Permanent, Full-Time, 8-hour Day Shift

Start Date: 18-August-2025

Posting Date: 22-July-2025

Closing Date: 11-August-2025 or Open Until Filled

Position Summary

Orillia Cardiac Care is currently seeking a skilled and dedicated Cardiac Sonographer to join our dynamic and collaborative healthcare team. The ideal candidate will be responsible for performing echocardiographic examinations to assist in the diagnosis and treatment of cardiac conditions. This role requires a keen attention to detail, strong technical skills, and the ability to communicate effectively with patients and medical staff. The successful candidate will work closely with cardiologists and other healthcare professionals to provide high-quality diagnostic services in a patient-centered environment.

Compensation and Benefits

- Salary: \$45.00 - \$52.00 per hour. Commensurate with experience and quality of scans.
- Comprehensive health benefits package included.
- Professional development combined with continuing education and support.
- Supportive team dynamics and environment.

Duties and Responsibilities

- Work independently to acquire and analyze diagnostic images using ultrasound technology and ensure optimal image quality to CorHealth Ontario standards of a wide range of echocardiographic procedures, including transthoracic echocardiograms (TTE), stress echocardiography, and contrast and bubble studies.
- Be familiar with, and evaluate, different aspects of the heart, such as chamber size, valve function and blood flow using ASE guidelines. Have knowledge of basic cardiac conditions in order to recognize and identify any abnormalities.
- Stay current with advancements in echocardiography techniques and medical technology. Participate in quality assurance and improvement initiatives.
- Adhere to safety protocols and infection control measures during all procedures.

- Maintain ultrasound equipment, ensuring it functions properly and report any malfunctions or issues. Ensure the workspace is clean and organized.
- Be knowledgeable and confident to contact physician if critical pathology is noted during examination, as per policy
- Collaborate with physicians and other healthcare professionals to discuss results and contribute to patient care plans where required.
- Use reporting software to analyze and prepare thorough and accurate preliminary reports for physician interpretation. Document findings accurately in patients' electronic medical records
- Review patient charts and obtain vitals, including height and weight, on all patients prior to examination. Prepare patients for procedures by explaining the process to ensure their comfort, safety and privacy
- Demonstrate effective problem-solving skills, critical thinking and ability to prioritize in a fast-paced clinic environment. Require basic troubleshooting skills when required.
- The successful candidate should ensure that they are able to work as a committed member of the clinic team, during periods of downtime, it is expected that the sonographer will assist with holter set-up and cleaning, ECG diagnostics, assist front desk staff where needed and complete other tasks as directed by the office manager

Qualifications

- Graduate of a recognized program in Diagnostic Medical Adult Sonography
- Registered with A.R.D.M.S. and/or C.A.R.D.U.P.
- Certification in Cardiac Imaging and Adult Echocardiography.
- Follow complete protocol as per Cardiac Care Network requirements for performing adult sonography.
- Perform full protocol resting echocardiograms and stress echocardiograms.
- Current BLS certification.
- 1+ year experience preferred; new graduates welcome.
- Strong knowledge of cardiac anatomy, pathology, and ultrasound physics.
- Proficiency in medical terminology related to cardiology
- Strong interpersonal and communication skills with the ability to interact compassionately with patients
- Attention to detail and excellent organizational skills
- Ability to work independently, collaboratively in a team setting, and effectively in a fast-paced environment while maintaining high standards of patient care.

Preferred Skills and Assets

- Familiarity with PACS and electronic health records (specifically Arya EHR)
- Knowledge of strain imaging is an asset.
- Experience with IV insertion and contrast echo an asset, but willing provide education and training.
