

ERIKA RODRIGUEZ

Mid-Senior .Net Developer

About me

Hi, I'm Erika. I'm 33 years old and I live in Mallorca. I currently work as a backend developer at Centauro Rent a Car, a leading company in the car rental sector. Previously, I worked as a fullstack developer at Atmira for banking clients such as Medilanium and Caixa, and in the tourism sector at Innovation Strategies for Iberostar.

I am a self-taught person, always up-to-date with new technologies. I enjoy training and guiding my colleagues, and I am used to working on both small incremental improvements and large projects.

I am passionate about video games, mechanical keyboards, the world of motorbikes and cycling, and going on hikes to incredible places.
