About Us

Favor Eco Village Delmas Multipurpose was founded in 2016. It was registered with the CIPC and social as a NPO in 2021. It is situated at Delmas Eloff Mimosa, Mpumalanga. It was founded on humanitarian principles to serve and support children and senior citizens of Delmas.

With Favor meaning: an act of kindness, and Eco: an environmental sustainable or dwelling place, the organization stands for kindness, protection and the empowerment of children and the elderly, giving them hope and strengthening their capacity to be the best that they can.

Programs We Offer

We provide an opportunity for the needy, elderly, children and orphans, to live and learn under one roof until they are integrated in the community or placed with family members who can take better care of them (due to extreme poverty, neglect and abuse).

In addition to the aforementioned, we provide:

- Seminar and structural meetings.
- Group work sessions.
- Help the vulnerable and marginalized to gain control over their lives
- Health service clinic.
- Effective education from ECD to tertiary.

We thus seek to attain social development through professional intervention at personal, family, community and civic level by working co-operatively with departments of Education, Social Development, Health and Local Authorities.

To Support and Serve

VISION

A community where young ones have greater opportunities to live like children. Furthermore, social cohesion (Ubuntu), which allows for a child friendly society that helps them realize their full potential. We maintain that education is the key.

Health systems for the elderly, and secure and excellent home care for them. Moreover, that they may continue participating in society.

Providing access to crisis intervention systems. Additionally, counselling and education services for those impacted by domestic violence and sexual abuse.

MISSION

Eco-Village exists within the community of Delmas to improve the quality of life for orphans, senior citizens, and vulnerable children through effective programming around education, health and other social service support systems.

Support Structures

1.

NUTRITIONAL SUPPORT

This is one of the key interventions to combat the constant challenge of child and elderly headed households, and other orphaned and vulnerable children in Delmas (including those with chronic conditions). We are aware that decent meals are hard to come by, hence we provide nutritious food parcels and sanitary on a monthly basis, delivered to their places of residence. We also help start and run nutritional gardens for families for the purpose of producing the food they need, themselves. Moreover, we avail ourselves to ensure vitamin and minerals support.

2.

PSYCHOSOCIAL SUPPORT

This is mainstreamed in all our program areas. Some of the main sectional activities include providing initial professional contact with clients requiring support or assistance from Eco Village.

Foster Care Program

Eco village works mainly with formal foster cares properly screened by the Department of Social Welfare.

3.

EDUCATIONAL SUPPORT

Concerning our ECD education programme, we follow a theme-based curriculum with an emphasis on play. A small group of children in each class enables the teacher to focus on the individual needs of each child. Programmes allow for both structure and free play activities. It also includes development of various skills e.g. visual perception, auditory perception, language, science, music and movement, gross motor, fine motor, creative art, and life skills.

The education programme ensures that all children enrolled with Eco Village are placed in institutions of learning and development from ECD to tertiary. We make provision of the children's school uniforms, stationary and other learning needs, providing a link between the school and families.

We do all we can to make all parents or caregivers interested in children's education as well as motivate the children to remain in school for the best possible grades. Emphasis is placed on excellence in area of studies and academic performance. We facilitate the payment of fees, retention of children in school, and provide after school support to motivate children's improved results.

4.

PSYCHOSOCIAL SUPPORT

This program gives care and support to the elderly, orphaned children and adults who have chronic conditions, have been raped, and abused physically and mentally. We facilitate proper diagnosis by ensuring supervised clinic referrals, and patients on ART (Antiretroviral therapy) are transported to appropriate clinics and hospitals on a monthly basis. We furthermore organize therapists for counselling sessions. Home visits are also conducted to ensure adherence to treatment, and home care for senior citizens.

To Support and Serve

ACTIVITIES

Eco Village provides for the basic needs of orphaned and vulnerable children. These needs include monthly food parcel deliveries, clothing, water, electricity, school fees, uniforms and transport.

- Delivers food parcels on a monthly basis.
- Applies for bursaries for children for tertiary education.
- Assists with job applications for children moving into the workplace.
- Facilitates events and activities to help the children and elderly in their holistic development.
- Assistance with the acquisition of Identity Documents.
- Provision of after school care, homework support, music and dance classes (including a drop in center).

SAFETY AND SECURITY

Eco-Village will link with Security Company in the near future. We have strict policies and procedures to ensure the safety and well-being of the elderly and the children.

YOUR INVOLVEMENT

As a non profit organization, Eco Village relies on volunteers and the charitable giving of people who care about the future of our South African senior citizens and children. We offer our special and sincere thanks to all who make donations of time, money, supplies, and other resources. Your generosity makes us successful!

Furthermore, we undertake to provide a detailed project write up for any project of interest to any partner. Additionally, any amount of funding is appreciated as these are already running projects that require capacity enhancement.
