CyberComply Product Features

Isolated Deployment Model

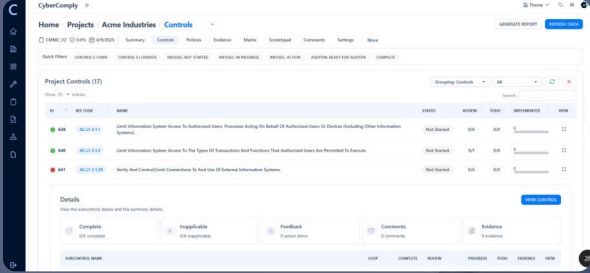

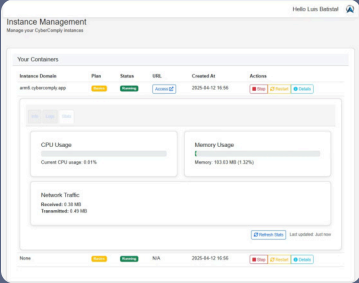

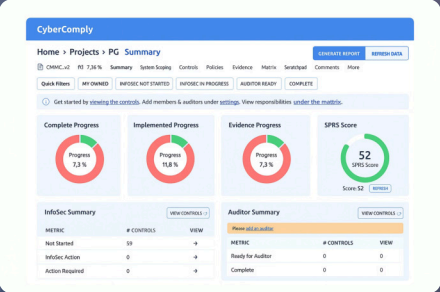

Each instance is deployed in its own secure, containerized enclave-ensuring full isolation between customer environments.

Dedicated SSL Certificate Per Instance

Every instance includes its own SSL certificate, providing encrypted traffic and minimizing cross-tenant exposure.

Detailed Control Implementation Guidance

Includes step-by-step instructions for every control and subcontrol from NIST SP 800-171 Rev. 2.

Automated POA&M Generation

CyberComply auto-generates a Plan of Action & Milestones from identified gaps-structured and ready for remediation.

Tailored SSPs and POA&Ms via Dynamic Scoping

Scoping inputs power personalized compliance documentation, showing only relevant requirements and outputs.

Evidence Upload Per Control/Subcontrol

Upload and organize supporting files like policies, logs, and screenshots directly under each requirement.

Policy & Procedure Template Library

Includes editable templates covering all 14 CMMC domains-ready to customize and adopt.

Audit Readiness Mode

Simulate a mock C3PAO assessment, rehearse interviews, and review evidence in a real-world audit format.

No FCI or CUI Storage

Designed to support non-sensitive workflows; CyberComply does not transmit or store FCI/CUI.

Multi-Tenant Mode

Ideal for MSPs, MSSPs, consultants, and C3PAOs managing multiple clients with secure access control.

Full CMMC Level 2 Control Set

Covers all 110 controls and 320+ subcontrols per NIST SP 800-171 Rev. 2-complete and always current.

Pricing

\$399 / Month

with annual subscription

\$480 / Month

paid quarterly
