FORTE

FTP Network Shielded Patch Panel 1 U Angled Patch Panel V Type 24 Port

- Modular Shielded Copper Patch Panel provides a centered cable distribution to management rooms, equipment rooms, and data center information points in a smart building structured cabling system.
- Coupled with information modules, copper patch cords, and other terminating plug-ins, it provides inlets and outlets for horizontal and vertical cabling (data, voice, etc.).
- The patch panel supports 19-inch cabinet installation, and its modular design realizes optimal space utilization, providing a strong guarantee for structured cabling installation, maintenance, and management.

Technical Data

Feature	– The patch panel features a 19-inch mount and 1U height, rear frame in high-grade zinc-plated material that has excellent corrosion resistance. – It houses all TC's shielded jacks and accommodates at most 24 RJ45 copper patch cords in 1U height. – Labeling is provided for port identification, and each modular port can set high-definition labels for real-time use. – The rear frame has built-in cable slots, no extra accessories needed for tidy cable management, reducing the impact of cable weight on field termination.
Dimensions	19-inch, 1U, rear cable management holder in 154mm depth
Material	Front frame and rear cable management holder: plastics + zinc-plated
Flammability	GB/T 5169.11
Compatibility	RJ45 modules compatible with standard keystone jacks
Weight (with package)	1.2kg per piece, 15kg per box (12 pieces)
