

Interior Roach & Targeted Pest Treatment – Important Information & Expectations

Overview

Interior roach and targeted pest treatments are designed to eliminate infestations through precise, professional application. Success depends on preparation, access, and allowing the treatment to work undisturbed. This service is focused on interior zones where pest activity is concentrated. Large appliances do not need to be moved, and doing so beforehand may disrupt pest harborages and reduce treatment effectiveness. Your technician will move items if necessary during service.

What to Expect

Expect to see increased pest activity in the days following service — this is normal and means the treatment is working. Most treatments begin reducing activity within 3–7 days. Severe infestations may require follow-up visits, depending on conditions and pest pressure.

Avoid cleaning treated areas for at least 24 hours after service. Do not use any cleaning chemicals in affected zones until the issue is resolved.

Preparation Requirements

Please complete the following before your scheduled service:

- Sweep, vacuum, and mop all floors.
- Remove all items from kitchen and bathroom cabinets and drawers.
- Clean all kitchen and bathroom countertops, removing small appliances and personal items.
- Properly store or discard any open or infested food items.
- Take out all household trash, especially in the kitchen, bathrooms, and bedrooms.
- Do not move stoves, refrigerators, or large furniture. If the technician needs access behind or beneath them, they will handle it during service.

Occupancy & Safety

- All people and pets must be out of the home for a minimum of **4** hours after service.
- Cover or remove aquariums and disable air pumps.
- Pet food, water bowls, toys, and bedding should be removed from floors and stored during service.

After Care & Results

- Do not clean treated areas for 24 hours after service.
- Do not use store-bought sprays, foggers, or other pest products during or after our treatment.
- Pest sightings may increase temporarily — this is expected.
- If follow-up is needed, document activity (photos or samples) to help guide next steps.

Important Notice

By scheduling service, client acknowledges responsibility for preparation. Preparation will be verified at the time of service. Incomplete preparation may result in limited treatment, voided guarantees, rescheduled service, and additional fees. Questions should be addressed prior to service.
